Sustainable Tourism, Culture and Heritage Promotion Jorge Chica-Olmo, Miroslav Vujičić, Rui Alexandre Castanho, Uglješa Stankov, Eliana Martinelli, 2024-03-01 This proceedings book explores future prospects of cultural heritage and religious tourism and how it can impact the socioeconomic complexity of a community and future developments. It includes chapters on contemporary digital age pilgrimage, digital interpretation as a management strategy, tourism in the era of digital communication, and the role of social media in conserving intangible cultural heritage. This book focuses on policies and mechanisms for heritage preservation. It includes cultural heritage tourism management, how the digitalization of data has impacted and further developed tourism, World Heritage classification in urban tourism destinations, cultural tourism products and experiences. Moreover, it discusses the sustainable environment and geography in tourism. It covers topics such as ecotourism and rural sustainable development, heritage in socioeconomic sustainable development, and tourists' perceptions of tourism. Another part of the book explores the social and economic impacts of tourism. It includes chapters on cycling tourism along the Elbe, residents' perceptions of the socioeconomic benefits of restaurants, architecture of historical mosques, tourism as a driver of soft power, tourists' perceptions of service quality, tourism during the Covid 19 pandemic, gastronomic narratives in tourism, and residents' perceptions of festivals. Also, it pinpoints the focus on user interaction-based development. It includes chapters on the role of community-led initiatives in heritage revitalization and addressing connectivity issues between historical and natural touristic heritage sites. These research papers provide valuable insights into the multidimensional nature of cultural sustainable tourism, covering a wide range of topics and offering diverse perspectives on its development, management, and impact. **Ebook: Advertising and Promotion** Belch, 2014-09-16 **Ebook Advertising and Promotion** *Neighbourhood Structure and Health Promotion* Christiane Stock, Anne Ellaway, 2013-04-06 It has long been theorized that people living in poor areas have more health problems than their more advantaged peers. More recently, science has been testing this hypothesis, concentrating on the impact of the built environment on well-being and its contribution to health inequities. *Neighbourhood Structure and Health Promotion* offers sociology-based theory and evidence-based findings so readers may better understand the effects of place on health choices, behaviour, and outcomes. This international volume analyzes the complex relationships among neighbourhood conditions and characteristics, people's perceptions of where they live, and their everyday health lives, from eating habits and activity levels to smoking, drinking, and drug use. Chapters introduce innovative methods for measuring and monitoring links between place and health in terms of risks and resources and employing objective and subjective data. Prospects for engaging neighbourhoods in prevention efforts, particularly involving young people, and policy implications for the future of health promotion and inequity reduction are discussed as well. Included in the coverage: The spatiality of injustice, area effects on behaviour, Qualitative and quantitative methods for assessing neighbourhood health resources, The potential of GIS and GPS in the health sciences, Green spaces and

health possibilities for research and policy School neighbourhoods and obesity prevention in youth Connecting gender social environment and health Neighbourhood Structure and Health Promotion advances the study of this increasingly critical topic making it a valuable reference for researchers practitioners policy makers and advanced students in health health promotion social epidemiology and urban planning **Introduction to Global Health Promotion** Rick S.
