It provides a thorough single volume coverage of all Intel processors relative to their application in the PC and is as much an introduction to the PC itself as to Intel chips. Covers all PC related technologies including memory, data communications and PC bus standards. The second edition of The 8086/8088 Family Design, Programming and Interfacing has been revised to include the latest most up to date information and technologies. This edition now covers Windows, a description of the MS-DOS BIOS services and function calls, two completely revised software chapters, an updated chapter on memory coverage of the 16550 UART and common modern standards and a new chapter on PC architecture and the common bus systems.
