Middle School Career Guidance Lesson:

Career Counseling Dave Capuzzi, Mark D. Stauffer, 2012 This text provides the beginning counseling student with a comprehensive overview and discussion of the practical application of career counseling skills. Based on the view that counselors must be prepared in a holistic manner, it covers the historical and theoretical foundations of career counseling, the skills and techniques needed for career counseling, and contextual perspectives on career and lifestyle planning. Important material that is often overlooked in introductory texts is included such as career and lifestyle planning with clients in mental health rehabilitation and couples and family counseling settings, gender issues and working with LGBT and minority clients. Throughout the text, case studies, informational sidebars, and experiential activities make for a more engaging learning experience and encourage additional contemplation of chapter content. This new edition features new, updated, and expanded content throughout the division of career counseling in schools into separate chapters for K-8th grade, high school, and college, including traditional, hybrid, and online campuses, and an online instructor's manual with student resources offering material to enhance the pedagogical features of the text.

Career Development Across the Lifespan Grafton

Eliason, Mark Lepore, Jeff Samide, John Patrick, 2019-08-28 The second edition of *Career Counseling Across the Lifespan* provides an in-depth look at career development in community school and higher education counseling. It emphasizes career history and theories to prepare students for counseling environments and certification exams.

Career Counseling in P-12 Schools

Jennifer Curry, Jennifer R. Curry, Amy Milsom, 2013-08-12 This is the only text to present a comprehensive, developmental, and practical approach to preparing school counselors to conceptualize the career development needs of P-12 students and design and implement relevant career interventions. The text reflects the American School Counseling Association's National Model for school counseling to facilitate career development and college readiness as a core competency. It is grounded in developmental, ecosystemic, and career theories as a basis for career interventions. Considering the range of psychosocial, cognitive, and academic development spanning P-12 students, the authors review relevant developmental and career theories as a foundation for the design of sequential and developmentally appropriate career curricula and interventions. They provide information that helps school counselors and educators understand the ecosystemic influences on career development and discuss how and why to involve various stakeholders in their work with P-12 students. The text provides concrete examples of how to select, implement, and evaluate the outcomes of various career counseling theories and addresses career development and college readiness needs by grade level. It also considers cultural differences regarding P-12 career development. Concrete examples demonstrate concepts and case studies illustrate ways in which counselors can partner with parents and teachers. Examples represent individual, small group, and classroom interventions and highlight learning outcomes and assessment methods. Appendices include a matrix outlining where and how 2009 CACREP Standards are addressed and what types of course assignments can be used to provide artifacts. Key Features

Covers career counseling and development specifically geared to P 12 schools Reflects the ASCA s National Model for school counseling and facilitates career counseling as a core competency Describes a developmental ecosystemic approach informed by career theory Presents career counseling programs and interventions sequentially based on grade and age level Features case studies end of chapter discussion points self test questions and counselor activities Competency-based Career Development Strategies and the National Career Development Guidelines Howard H.
