**Hands-On Large Language Models** Jay Alammar, Maarten Grootendorst, 2024-09-11 AI has acquired startling new language capabilities in just the past few years. Driven by the rapid advances in deep learning, language AI systems are able to write and understand text better than ever before. This trend enables the rise of new features, products, and entire industries. With this book, Python developers will learn the practical tools and concepts they need to use these capabilities today. You'll learn how to use the power of pre-trained large language models for use cases like copywriting and summarization, create semantic search systems that go beyond keyword matching, build systems that classify and cluster text to enable scalable understanding of large amounts of text documents, and use existing libraries and pre-trained models for text classification, search, and clustering. This book also shows you how to build advanced LLM pipelines to cluster text documents and explore the topics they belong to, build semantic search engines that go beyond keyword search with methods like dense retrieval and rerankers, learn various use cases where these models can provide value, understand the architecture of underlying Transformer models like BERT and GPT, get a deeper understanding of how LLMs are trained, understand how different methods of fine-tuning optimize LLMs for specific applications, generative model fine-tuning, contrastive fine-tuning in context learning, etc.

**Beginning Google Maps Applications with Rails and Ajax** Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis, 2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. **Beginning Google Maps Applications with Rails and Ajax** From Novice to Professional is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications. Proceeding far beyond simplistic map display you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world. The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments and building community driven maps. You'll want to pick up a copy of this book because this is the first book to comprehensively introduce the Google Maps application development using the Rails development framework. You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release. It is written by four developers actively involved in the creation of location based mapping services. For additional info please visit the author's reference site for this book.

**Google Maps SEO** Matthew Gumke, 2019-09 If you're not first you're last. Grant Cardone. The best place to hide a dead body is on the 2nd page of Google. SEO Community. In this book you'll learn how to rank your business first on Google Maps. The author is Matthew Gumke. Matthew Gumke is a 24 year old Entrepreneur and Philanthropist who created his first 6 figure online business in 2017. Matthew has built a personal brand of over 100,000 Facebook followers and over 50,000 Instagram followers along with being featured in major publications for his businesses for his expertise in SEO. Learning SEO led Matthew into many different industries along with creating his own books and programs to teach people how he's been able to monetize Google Search Engine to create multiple income streams. Matthew's notable mentors and business partners include Tony Robbins, Naveen Jain, Forbes, Riley, Tai Lopez and Ekim Kaya. Being 1st on Google maps is crucially important. To rank you'll need to learn Google Maps SEO. When searching for a local business many consumers search through maps. If you're not 1st on Google maps you're losing money. Lots of money. Every single day a potential long term customer is going to your competitor. Unless the customer has a bad experience it's likely you won't have them as a customer the rest of their life. Being 1st on Google maps isn't just costing you money on a day to day basis it's negatively impacting every day the rest of your life. Impact. You love your business your business helps people. You're doing your customers a disservice when they search for a local business and go to a competitor. This affects the amount of impact you can leave in the world. Respect. If you're not 1st on Google you'll lose respect in the eyes of many of your customers. They won't see you as the market leader. They'll try to negotiate discounts and haggle you for every penny. It's not just your customers you'll lose respect in the eyes of many business owners. They won't think you're serious about your business. As a result you'll lose referrals and other opportunities.

Freedom The difference between freedom for many business owners is a 1st place Google ranking When you re first on Google you don t need to prospect for new customers By dominating your industry you can easily create time freedom It s not the best business owner that gets freedom it s the business owner that s first on Google I could list more reasons why your business needs to be 1st on Google maps but to be honest I don t want to disrespect your intelligence If you didn t know you need to be 1st on Google maps you wouldn t be reading this In this book I ve laid out 8 easy to follow steps An idiot could do this SEO doesn t need to be difficult It s really easy once you know everything Anyone that tells you it s really difficult and you can t do it yourself is trying to sell you their services Someone with no computer experience could follow these 8 steps and rank first on Google maps What are you waiting for Read the book today and ROCKET your business to the top
