Oil In Uganda International Lessons For Success:

Oil in Uganda Ben Shepherd, 2015-07-28 The resource curse is not inevitable Uganda has time on its side but it must not waste it The debate on oil must move beyond the politics of the present and look to the long term Oil will be central to Uganda for decades to come It is incumbent on today's leaders in government opposition and civil society alike to work together to ensure a bright future for generations to come Lessons can be learned from those countries that have successfully managed natural resources as well as those that have suffered from their mismanagement Transparency matters if Uganda's social cohesion is going to be maintained A well informed national conversation on how to balance spending with saving is vital to the health of the agricultural sector and key to a positive future The need to protect technical advice from political influence is vital across all governments And a population that understands how revenues are being spent is more likely to work with government rather than against it building a positive feedback mechanism between people and the state that can act as a bulwark against future abuses

Oil Wealth and Development in Uganda and Beyond Arnim

Langer, Ukoha Ukiwo, Pamela Mbabazi, 2020-01-07 Multidisciplinary perspectives to governance of oil in African countries Large quantities of oil were discovered in the Albertine Rift Valley in Western Uganda in 2006 The sound management of these oil resources and revenues is undoubtedly one of the key public policy challenges for Uganda as it is for other African countries with large oil and or gas endowments With oil expected to start flowing in 2021 the current book analyses how this East African country is preparing for the challenge of effectively efficiently and transparently managing its oil sector and resources Adopting a multidisciplinary comprehensive and comparative approach the book identifies a broad scope of issues that need to be addressed in order for Uganda to realise the full potential of its oil wealth for national economic transformation Predominantly grounded in local scholarship and including chapters drawing on the experiences of Nigeria Ghana and Kenya the book blazes a trail on governance of African oil in an era of emerging producers Oil Wealth and Development in Uganda and Beyond will be of great interest to social scientists and economic and social policy makers in oil producing countries It is suitable for course adoption across such disciplines as International Global Affairs Political Economy Geography Environmental Studies Economics Energy Studies Development Politics Peace Security and African Studies Contributors Badru Bukenya Makerere University Moses Isabirye Busitema University Wilson Bahati Kazi Uganda Revenue Authority Corti Paul Lakuma Economic Policy Research Centre Joseph Mawejje Economic Policy Research Centre Pamela Mbabazi Uganda National Planning Authority Martin Muhangi independent researcher Roberts Muriisa Mbarara University of Science and Technology Chris Byaruhanga Musiime independent researcher Germano Mwabu University of Nairobi Jackson A Mwakali Makerere University Tom Owang Mbarara University of Science and Technology Joseph Oloka Onyango Makerere University Peter Quartey University of Ghana Peter Wandera Transparency International Uganda Kathleen Brophy Transparency International Uganda Jaqueline Nakaiza independent researcher Babra Beyeza independent researcher

Two key long term energy trends are shifting the strategic balance between the United States and China the world's superpower rivals in the 21st century first a domestic boom in U S shale oil and gas is dramatically boosting America's energy security second the frenetic and successful search for hydrocarbons in Africa is making it an increasingly crucial element in China's energy diversification strategy America's increasing energy security and China's increased dependence

on energy imports from Africa and the Middle East until well past 2040 despite its own shale discoveries will make Beijing's own increasing energy insecurity be felt even more acutely pushing the People's Liberation Army to accelerate adoption of a two ocean military strategy that includes an enduring presence in the Indian Ocean as well as the Pacific Ocean
