**User Experience, Wearable and Assistive Technology** Tareq Ahram, Christianne Falcão, 2020-07-01 This book addresses emerging issues in usability interface design human computer interaction user experience and assistive technology. It highlights research aimed at understanding human interactions with products services and systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment offering them support with mobility communication positioning environmental control and daily living. The book covers modeling as well as innovative design concepts with a special emphasis on user centered design and design for specific populations particularly the elderly. Further topics include virtual reality digital environments gaming heuristic evaluation and forms of device interface feedback e.g. visual and haptic. Based on the AHFE 2020 Virtual Conference on Usability and User Experience the AHFE 2020 Virtual Conference on Human Factors and Assistive Technology the AHFE Virtual Conference on Human Factors and Wearable Technologies and the AHFE 2020 Virtual Conference on Virtual Environments and Game Design held on July 16-20 2020 it provides academics and professionals with an extensive source of information and a timely guide to tools applications and future challenges in these fields

**Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2015-10-02 As modern technologies continue to develop and evolve the ability of users to interface with new systems becomes a paramount concern. Research into new ways for humans to make use of advanced computers and other such technologies is necessary to fully realize the potential of 21st century tools. Human Computer Interaction Concepts Methodologies Tools and Applications gathers research on user interfaces for advanced technologies and how these interfaces can facilitate new developments in the fields of robotics assistive technologies and computational intelligence. This four volume reference contains cutting edge research for computer scientists faculty and students of robotics digital science and networked communications and clinicians invested in assistive technologies. This seminal reference work includes chapters on topics pertaining to system usability interactive design mobile interfaces virtual worlds and more
