Online Book Scanning Pharaohs Imaging Kingdom Mummies:

Scanning the Pharaohs Zahi A. Hawass, Sahar Saleem, 2016 The royal mummies in the Cairo Museum are an important source of information about the lives of the ancient Egyptians. The remains of these pharaohs and queens can inform us about their age at death and medical conditions from which they may have suffered as well as the mummification process and objects placed within the wrappings. Using the latest technology including Multi Detector Computed Tomography and DNA analysis the authors present the results of the examination of the royal mummies. New imaging techniques not only reveal a wealth of information about each mummy but render amazingly lifelike and detailed images of the remains.

Tutankhamun Martin Bommers, 2024-12-02 Over a century after his discovery this comprehensive biography of Tutankhamun explores a wealth of evidence including archaeological and ancient textual sources DNA analysis and CT scanning bringing to life a pharaoh who has remained elusive apart from his grandiose tomb treasures. For the first time this volume identifies the names of Tutankhamun's biological parents tracing the footsteps of his short life that was marked by genetic defects and physical deterioration. Between his early days and his untimely death Tutankhamun previously Tutankhaten appears as a child of his time he was torn between the cult of the Aten and the restoration of the cult of Amun a campaign in which he personally played a leading role. Equipped with a thorough education gifted with a brilliant mind and living mostly in solitude readers will follow in detail how Tutankhamun secured the survival of the 18th Dynasty. This book traces Tutankhamun's involvement in processes which can still be felt in Egypt today. His complex personality is reconstructed based on archaeological evidence some of which has never been discussed previously and conclusions drawn from both scientific research and a deep understanding of the context in which he lived. By also considering the lives of those who were close to the teenage king this book delivers a comprehensive source based biography of an ancient Egyptian pharaoh. Complete with intensive references to international scholarship visual sources and maps and excluding the tomb treasures created after his physical death this book is a fresh and original approach to understanding the life not afterlife of the most popular pharaoh of modern times Tutankhamun. A Biography is suitable for students scholars and non-specialist readers interested in the life of Tutankhamun as well as those working on ancient Egyptian history and religion more broadly particularly that of New Kingdom Egypt.

Meritaton, The Unknown Queen of Akhet-Aton and Ankhesenamun, The Queen Consort of Tutankhamun

Marie Elisabeth Habicht, Michael E. Habicht, 2022-12-28 Meritaton The title of the book refers to Meritaton as the unknown Queen of Akhet Aton. Indeed she is difficult to define one of her trademarks in iconographic art is the bald head and often she does not wear any cloths. The book tries to collect important information and images of the Queen that might have played a pivotal role in the transition of the falling Amarna period back to the conventional state concept under King Tutankhamun. Ankhesenamun The book deals with the life and death of Ankhesenamun the queen consort at Tutankhamun's side which can be reconstructed from historical sources. The question of

whether she was the mysterious Dahamunzu who wrote a strange letter to the hostile king of the Hittites is discussed in detail. On the basis of the images that can be attributed to her an attempt is also made to define the appearance of Ankhesenamun and to suggest possible mummies which are discussed in the research KV 21A or CG 61076. It is possible however that the burial of Ankhesenamun has not yet been found for there are no traces that would indicate a looted tomb.

The Osteology and Taphonomy of Ancient Egyptian Human Remains Pamela C. Gamboa, 2025-04-08 The Osteology and Taphonomy of Ancient Egyptian Human Remains analyzes several Egyptological studies and addresses potential knowledge gaps in the areas of osteology paleopathology archaeoanthropology and taphonomy that may be affecting the interpretation of the findings in the following cases. The osteological and paleopathological findings from the commoners excavated at Amarna that claim these were the remains of a starved and exploited population. The age determination identification and possible perimortem injuries of the individual from tomb KV55. The body positions of Unknown Man E and Unknown Woman A together with the identification and determined cause of death of Unknown Man E. The taphonomic changes of a Greco-Roman mummy are also discussed. The methodology and different aspects of the identification of the individual KV60 A identified as Hatshepsut including sex determination and original arm position. Dental appliances so called dental bridges and their possible use. The purpose of this investigation is to uncover the origins and rationale behind the conclusions in the aforementioned studies and offer alternative explanations for the phenomena encountered in them which align with the author's areas of expertise that encompass osteology paleopathology archaeoanthropology and taphonomy.
