Online Reading Programs For Struggling Readers:

A Guide for Librarians on the Science of Reading Dr. Daniel A. Sabol, 2025-02-25 The Science of Reading is an interdisciplinary body of research that examines how people learn to read and identifies the most effective methods for teaching literacy. Rooted in cognitive psychology, neuroscience, and linguistics, it provides evidence-based insights into the processes of reading development, emphasizing foundational skills like phonemic awareness, phonics, fluency, vocabulary, and comprehension. Unlike older disproven methods such as the three cueing system, the Science of Reading highlights the importance of explicit, systematic instruction, particularly in phonics and decoding. By understanding how the brain processes written language and applying structured literacy approaches, educators can address learning gaps, support struggling readers, and foster equitable access to literacy for all students. This research-driven framework is reshaping literacy education worldwide, offering a path to improved outcomes for diverse learners.

Advanced Literacy Practices Evan Ortlieb, Earl H. Cheek Jr., 2013-01-28 Advanced Literacy Practices: From the Clinic to the Classroom includes elements of designing literacy clinics, models of reading and writing practices, technology-based instruction, and frameworks for meeting the diverse needs of students. Recommendations are provided in this research-based practical guide for planning and instruction within literacy.

[Teaching with Literacy Programs](#) Patricia A. Edwards, Kristen L. White, Ann M. Castle, Laura J. Hopkins, 2023-09-21 Winner of the AACTE 2025 Gloria J. Ladson Billings Outstanding Book Award. A step-by-step guide to developing equitable literacy instruction by adapting curriculum to support diverse learners. In *Teaching with Literacy Programs*, Patricia A. Edwards, Kristen L. White, Laura J. Hopkins, and Ann M. Castle present a model that allows educators to address educational inequity through the critical and adaptive use of existing literacy curriculum materials. In this accessible work, they advise educators on ways to combine common classroom materials such as basal readers and core reading programs with instructional practices that provide high-quality responsive instruction to all students. Edwards, White, Hopkins, and Castle credit literacy instruction as a core part of overall educational equity and they recognize the crucial role that educators play in translating materials into instruction that benefits all learners. Here, they offer teacher education in support of this essential role, deftly guiding educators through a four-part development process: CARE, an acronym for cultivating critical consciousness, analyzing materials, reconstructing curricula, and evaluating instruction reflectively to advance equity. Built upon culturally relevant, sustaining, and antiracist pedagogy, CARE enables teachers to provide literacy instruction that meets the range of needs and performance levels in classrooms, supporting students in attaining academic achievement, cultural competence, and critical consciousness. The approach outlined in this work, which can be put into immediate practice, helps educators to provide literacy instruction that builds on students' multiple literacies and reduces educational inequity.
