Adoption and impact of OER in the Global South Cheryl Hodgkinson-Williams, Brazil Arinto, 2017-12-29 Education in the Global South faces several key interrelated challenges for which Open Educational Resources OER are seen to be part of the solution. These challenges include unequal access to education, variable quality of educational resources, teaching and student performance, and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development ROER4D project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education, as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy practice and research in developing countries.

**Handbook of Mobile Learning** Zane L. Berge, Lin Muilenburg, 2013-06-19 Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award. This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

Our Energy Future Don E. Albrecht, 2014-07-25 Rapid changes in energy production and consumption are having major socioeconomic implications for the communities of rural America. Technological developments in horizontal drilling, hydraulic fracturing, nuclear energy, biofuels, wind, and solar energy have significantly increased domestic energy production, and the production of energy from renewable sources has encouraged energy efficiency. Yet severe concerns persist, and policy decisions on energy issues will have profound implications for all Americans and rural communities, where consequences are experienced most directly. Thus, the time is appropriate for a careful exploration of the socioeconomic implications of our energy future. The purpose of this book is to present timely and scientifically sound information on energy policy, socioeconomic aspects of energy production and consumption, with a focus on rural areas. The book presents the latest research by top scholars with the goal of clarifying options and providing the basis for informed policy decisions.
