Proceedings American Society for Engineering Education. Conference,1995 Artificial Intelligence in the Pacific Rim
Hozumi Tanaka,1991 In the last decade AI firmly settled into our industrial society with the expert systems as the
representative product However almost every one of the systems could cover only a single task domain In the highly
mechanized world of the 21st century systems will become smart and user friendly enough to cover a wide range of task
domains Systems with much user friendliness must be multilingual because users in different domains usually have different
languages Language is formed in its own culture Therefore promotion for cross cultural scientific interchange will be
indispensable for the progress of AI **Annual Conference Proceedings** American Society for Engineering Education.
