*The Speculative City* Susanna Phillips Newbury, 2021-04-20 A forensic examination of the mutual relationship between art and real estate in a transforming Los Angeles. Underlying every great city is a rich and vibrant culture that shapes the texture of life within. In *The Speculative City*, Susanna Phillips Newbury teases out how art and Los Angeles shaped one another's evolution. She compellingly articulates how together they transformed the Southland, establishing the foundation for its contemporary art infrastructure and explains how artists came to influence Los Angeles's burgeoning definition as the global city of the twenty-first century. Pairing particular works of art with specific innovations in real estate development, *The Speculative City* reveals the connections between real estate and contemporary art as they constructed Los Angeles's present-day cityscape. From banal parking lots to Frank Gehry's designs for artists' studios and museums, Newbury examines pivotal interventions by artists and architects, city officials, and cultural philanthropists, concluding with an examination of how, in the wake of the 2008 global credit crisis, contemporary art emerged as a financial asset to fuel private wealth and urban gentrification. Both a history of the transformation of the Southland and a forensic examination of works of art, *The Speculative City* is a rich complement to the California chronicles by such writers as Rebecca Solnit and Mike Davis.

**Learning in the Anthropocene** Carl A. Maida, 2023-11-13 Learning in the Anthropocene: Reimagining Education in the Twenty-First Century reimagines the education of future generations in our complex society. Carl A. Maida argues we are living in an era of transition that has been repeatedly called an age of acceleration, and in this time of crisis, diverse constituencies will need to coalesce and create place-based arenas for critical inquiry and reflection around biodiversity, energy, and sustainability concerns. Education is therefore critical to the public sphere, which is polarized by contentious debates over class, ethnicity, culture, and more recently, the fate of the planet. He posits that two provinces, the school and society, can join together to afford students greater freedom to produce future knowledge by advancing experiential instructional approaches as humanity faces profound challenges to its existence.

**The Routledge Companion to Urban Imaginaries** Christoph Lindner, Miriam Meissner, 2018-09-28 *The Routledge Companion to Urban Imaginaries* delves into examples of urban imaginaries across multiple media and geographies, from new visions of smart, eco, and resilient cities to urban dystopias in popular culture, from architectural renderings of starchitecture and luxury living to performative activism for new spatial justice, and from speculative experiments in urban planning fiction and photography to augmented urban realities in crowd mapping and mobile apps. The volume brings various global perspectives together and into close dialogue to offer a broad interdisciplinary and critical overview of the current state of research on urban

imaginaries Questioning the politics of urban imagination the companion gives particular attention to the role that urban imaginaries play in shaping the future of urban societies communities and built environments Throughout the companion issues of power resistance and uneven geographical development remain central Adopting a transnational perspective the volume challenges research on urban imaginaries from the perspective of globalization and postcolonial studies inviting critical reconsiderations of urbanism in its diverse current forms and definitions In the process the companion explores issues of Western centrism in urban research and design and accommodates current attempts to radically rethink urban form and experience This is an essential resource for scholars and graduate researchers in the fields of urban planning and architecture art media and cultural studies film visual and literary studies sociology and political science geography and anthropology
