

53

An introduction to partial differential equations

53.1 Introduction

A partial differential equation is an equation that contains one or more partial derivatives. Examples include:

$$(i) \quad a \frac{\partial u}{\partial x} + b \frac{\partial u}{\partial y} = c$$

$$(ii) \quad \frac{\partial^2 u}{\partial x^2} = \frac{1}{c^2} \frac{\partial u}{\partial t}$$

(known as the heat conduction equation)

$$(iii) \quad \frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$$

(known as Laplace's equation)

Equation (i) is a **first order partial differential equation**, and equations (ii) and (iii) are **second order partial differential equations** since the highest power of the differential is 2.

Partial differential equations occur in many areas of engineering and technology; electrostatics, heat conduction, magnetism, wave motion, hydrodynamics and aerodynamics all use models that involve partial differential equations. Such equations are difficult to solve, but techniques have been developed for the simpler types. In fact, for all but for the simplest cases, there are a number of numerical methods of solutions of partial differential equations available.

To be able to solve simple partial differential equations knowledge of the following is required:

- (a) partial integration,
- (b) first and second order partial differentiation — as explained in Chapter 34, and
- (c) the solution of ordinary differential equations — as explained in Chapters 46–51.

It should be appreciated that whole books have been written on partial differential equations and their

solutions. This chapter does no more than introduce the topic.

53.2 Partial integration

Integration is the reverse process of differentiation.

Thus, if, for example, $\frac{\partial u}{\partial t} = 5 \cos x \sin t$ is integrated partially with respect to t , then the $5 \cos x$ term is considered as a constant,

$$\begin{aligned} \text{and } u &= \int 5 \cos x \sin t \, dt = (5 \cos x) \int \sin t \, dt \\ &= (5 \cos x)(-\cos t) + c \\ &= -5 \cos x \cos t + f(x) \end{aligned}$$

Similarly, if $\frac{\partial^2 u}{\partial x \partial y} = 6x^2 \cos 2y$ is integrated partially with respect to y ,

$$\begin{aligned} \text{then } \frac{\partial u}{\partial x} &= \int 6x^2 \cos 2y \, dy = (6x^2) \int \cos 2y \, dy \\ &= (6x^2) \left(\frac{1}{2} \sin 2y \right) + f(x) \\ &= 3x^2 \sin 2y + f(x) \end{aligned}$$

and integrating $\frac{\partial u}{\partial x}$ partially with respect to x gives:

$$\begin{aligned} u &= \int [3x^2 \sin 2y + f(x)] \, dx \\ &= x^3 \sin 2y + (x)f(x) + g(y) \end{aligned}$$

$f(x)$ and $g(y)$ are functions that may be determined if extra information, called **boundary conditions** or **initial conditions**, are known.

Partial Differential Equations An Introduction

Michael Shearer, Rachel Levy

Partial Differential Equations An Introduction:

Partial Differential Equations Michael Shearer, Rachel Levy, 2015-03-01 An accessible yet rigorous introduction to partial differential equations This textbook provides beginning graduate students and advanced undergraduates with an accessible introduction to the rich subject of partial differential equations PDEs It presents a rigorous and clear explanation of the more elementary theoretical aspects of PDEs while also drawing connections to deeper analysis and applications The book serves as a needed bridge between basic undergraduate texts and more advanced books that require a significant background in functional analysis Topics include first order equations and the method of characteristics second order linear equations wave and heat equations Laplace and Poisson equations and separation of variables The book also covers fundamental solutions Green's functions and distributions beginning functional analysis applied to elliptic PDEs traveling wave solutions of selected parabolic PDEs and scalar conservation laws and systems of hyperbolic PDEs Provides an accessible yet rigorous introduction to partial differential equations Draws connections to advanced topics in analysis Covers applications to continuum mechanics An electronic solutions manual is available only to professors An online illustration package is available to professors [Partial Differential Equations: An Introduction With Mathematica And Maple](#) Ioannis P Stavroulakis, Stepan A Tersian, 1999-12-13 This textbook is a self contained introduction to partial differential equations It is designed for undergraduate and first year graduate students who are mathematics physics engineering or in general science majors The goal is to give an introduction to the basic equations of mathematical physics and the properties of their solutions based on classical calculus and ordinary differential equations Advanced concepts such as weak solutions and discontinuous solutions of nonlinear conservation laws are also considered The material is illustrated with model examples Mathematics software products such as Mathematica and Maple in ScientificWorkPlace are used in both graphical and computational aspects **Partial Differential Equations** Walter A. Strauss, 2007-12-21 Our understanding of the fundamental processes of the natural world is based to a large extent on partial differential equations PDEs The second edition of Partial Differential Equations provides an introduction to the basic properties of PDEs and the ideas and techniques that have proven useful in analyzing them It provides the student a broad perspective on the subject illustrates the incredibly rich variety of phenomena encompassed by it and imparts a working knowledge of the most important techniques of analysis of the solutions of the equations In this book mathematical jargon is minimized Our focus is on the three most classical PDEs the wave heat and Laplace equations Advanced concepts are introduced frequently but with the least possible technicalities The book is flexibly designed for juniors seniors or beginning graduate students in science engineering or mathematics **Partial Differential Equations** David L. Colton, 1988 This text offers students in mathematics engineering and the applied sciences a solid foundation for advanced studies in mathematics Classical topics presented in a modern context include coverage of integral equations and basic scattering theory Includes examples of inverse problems arising from improperly posed applications as

well as exercises many with answers An Introduction to Nonlinear Partial Differential Equations J. David Logan, 2008-04-11 Praise for the First Edition This book is well conceived and well written The author has succeeded in producing a text on nonlinear PDEs that is not only quite readable but also accessible to students from diverse backgrounds SIAM Review A practical introduction to nonlinear PDEs and their real world applications Now in a Second Edition this popular book on nonlinear partial differential equations PDEs contains expanded coverage on the central topics of applied mathematics in an elementary highly readable format and is accessible to students and researchers in the field of pure and applied mathematics This book provides a new focus on the increasing use of mathematical applications in the life sciences while also addressing key topics such as linear PDEs first order nonlinear PDEs classical and weak solutions shocks hyperbolic systems nonlinear diffusion and elliptic equations Unlike comparable books that typically only use formal proofs and theory to demonstrate results An Introduction to Nonlinear Partial Differential Equations Second Edition takes a more practical approach to nonlinear PDEs by emphasizing how the results are used why they are important and how they are applied to real problems The intertwining relationship between mathematics and physical phenomena is discovered using detailed examples of applications across various areas such as biology combustion traffic flow heat transfer fluid mechanics quantum mechanics and the chemical reactor theory New features of the Second Edition also include Additional intermediate level exercises that facilitate the development of advanced problem solving skills New applications in the biological sciences including age structure pattern formation and the propagation of diseases An expanded bibliography that facilitates further investigation into specialized topics With individual self contained chapters and a broad scope of coverage that offers instructors the flexibility to design courses to meet specific objectives An Introduction to Nonlinear Partial Differential Equations Second Edition is an ideal text for applied mathematics courses at the upper undergraduate and graduate levels It also serves as a valuable resource for researchers and professionals in the fields of mathematics biology engineering and physics who would like to further their knowledge of PDEs **Partial Differential Equations: An Introduction With**

Mathematica And Maple (2nd Edition) Ioannis P Stavroulakis, Stepan A Tersian, 2004-04-27 This textbook is a self contained introduction to partial differential equations It has been designed for undergraduates and first year graduate students majoring in mathematics physics engineering or science The text provides an introduction to the basic equations of mathematical physics and the properties of their solutions based on classical calculus and ordinary differential equations Advanced concepts such as weak solutions and discontinuous solutions of nonlinear conservation laws are also considered

Introduction to Partial Differential Equations with Applications E. C. Zachmanoglou, Dale W. Thoe, 1986-01-01 This text explores the essentials of partial differential equations as applied to engineering and the physical sciences Discusses ordinary differential equations integral curves and surfaces of vector fields the Cauchy Kovalevsky theory more Problems and answers **Introduction to Partial Differential Equations** Peter J. Olver, 2013-11-08 This textbook is designed for a one

year course covering the fundamentals of partial differential equations geared towards advanced undergraduates and beginning graduate students in mathematics science engineering and elsewhere The exposition carefully balances solution techniques mathematical rigor and significant applications all illustrated by numerous examples Extensive exercise sets appear at the end of almost every subsection and include straightforward computational problems to develop and reinforce new techniques and results details on theoretical developments and proofs challenging projects both computational and conceptual and supplementary material that motivates the student to delve further into the subject No previous experience with the subject of partial differential equations or Fourier theory is assumed the main prerequisites being undergraduate calculus both one and multi variable ordinary differential equations and basic linear algebra While the classical topics of separation of variables Fourier analysis boundary value problems Green's functions and special functions continue to form the core of an introductory course the inclusion of nonlinear equations shock wave dynamics symmetry and similarity the Maximum Principle financial models dispersion and solutions Huygens Principle quantum mechanical systems and more make this text well attuned to recent developments and trends in this active field of contemporary research Numerical approximation schemes are an important component of any introductory course and the text covers the two most basic approaches finite differences and finite elements

Applied Partial Differential Equations: An Introduction Alan Jeffrey, 2003 This work is for students who need more than the purely numerical solutions provided by programs like the MATLAB PDE Toolbox and those obtained by the method of separation of variables *Partial differential equations: an introduction* Günter Hellwig, **Introduction to Partial Differential Equations and Hilbert Space Methods** Karl E. Gustafson, 2012-04-26 Easy to use text examines principal method of solving partial differential equations 1st order systems computation methods and much more Over 600 exercises with answers for many Ideal for a 1 semester or full year course

Modern Methods in Partial Differential Equations Martin Schechter, 1977 *Numerical Solution of Partial Differential Equations* K. W. Morton, D. F. Mayers, 2005-04-11 This is the 2005 second edition of a highly successful and well respected textbook on the numerical techniques used to solve partial differential equations arising from mathematical models in science engineering and other fields The authors maintain an emphasis on finite difference methods for simple but representative examples of parabolic hyperbolic and elliptic equations from the first edition However this is augmented by new sections on finite volume methods modified equation analysis symplectic integration schemes convection diffusion problems multigrid and conjugate gradient methods and several sections including that on the energy method of analysis have been extensively rewritten to reflect modern developments Already an excellent choice for students and teachers in mathematics engineering and computer science departments the revised text includes more latest theoretical and industrial developments

Introduction to Partial Differential Equations with MATLAB Jeffery M. Cooper, 2012-12-06 Overview The subject of partial differential equations has an unchanging core of material but is constantly expanding and evolving The core consists

of solution methods mainly separation of variables for boundary value problems with constant coefficients in geometrically simple domains Too often an introductory course focuses exclusively on these core problems and techniques and leaves the student with the impression that there is no more to the subject Questions of existence uniqueness and well posedness are ignored In particular there is a lack of connection between the analytical side of the subject and the numerical side Furthermore nonlinear problems are omitted because they are too hard to deal with analytically Now however the availability of convenient powerful computational software has made it possible to enlarge the scope of the introductory course My goal in this text is to give the student a broader picture of the subject In addition to the basic core subjects I have included material on nonlinear problems and brief discussions of numerical methods I feel that it is important for the student to see nonlinear problems and numerical methods at the beginning of the course and not at the end when we usually run out of time Furthermore numerical methods should be introduced for each equation as it is studied not lumped together in a final chapter

Introduction To Partial Differential Equations (With Maple), An: A Concise Course Zhilin Li, Larry Norris, 2021-09-23 The book is designed for undergraduate or beginning level graduate students and students from interdisciplinary areas including engineers and others who need to use partial differential equations Fourier series Fourier and Laplace transforms The prerequisite is a basic knowledge of calculus linear algebra and ordinary differential equations The textbook aims to be practical elementary and reasonably rigorous the book is concise in that it describes fundamental solution techniques for first order second order linear partial differential equations for general solutions fundamental solutions solution to Cauchy initial value problems and boundary value problems for different PDEs in one and two dimensions and different coordinates systems Analytic solutions to boundary value problems are based on Sturm Liouville eigenvalue problems and series solutions The book is accompanied with enough well tested Maple files and some Matlab codes that are available online The use of Maple makes the complicated series solution simple interactive and visible These features distinguish the book from other textbooks available in the related area

Partial Differential Equations Aleksei A. Dezin, 2012-12-06 Let me begin by explaining the meaning of the title of this book In essence the book studies boundary value problems for linear partial differential equations in a finite domain in n dimensional Euclidean space The problem that is investigated is the question of the dependence of the nature of the solvability of a given equation on the way in which the boundary conditions are chosen i.e. on the supplementary requirements which the solution is to satisfy on specified parts of the boundary The branch of mathematical analysis dealing with the study of boundary value problems for partial differential equations is often called mathematical physics Classical courses in this subject usually consider quite restricted classes of equations for which the problems have an immediate physical context or generalizations of such problems With the expanding domain of application of mathematical methods at the present time there often arise problems connected with the study of partial differential equations that do not belong to any of the classical types The elucidation of the correct

formulation of these problems and the study of the specific properties of the solutions of similar equations are closely related to the study of questions of a general nature Partial Differential Equations Bernard Epstein,1962 **Partial Differential Equations** Nita H. Shah,Mrudul Y. Jani,2020-12-28 Differential equations play a noticeable role in engineering physics economics and other disciplines They permit us to model changing forms in both mathematical and physical problems These equations are precisely used when a deterministic relation containing some continuously varying quantities and their rates of change in space and or time is recognized or postulated This book is intended to provide a straightforward introduction to the concept of partial differential equations It provides a diversity of numerical examples framed to nurture the intellectual level of scholars It includes enough examples to provide students with a clear concept and also offers short questions for comprehension Construction of real life problems is considered in the last chapter along with applications Research scholars and students working in the fields of engineering physics and different branches of mathematics need to learn the concepts of partial differential equations to solve their problems This book will serve their needs instead of having to use more complex books that contain more concepts than needed *Numerical Solution of Partial Differential Equations* K. W. Morton,1994 An Introduction to Partial Differential Equations Yehuda Pinchover,Jacob Rubinstein,2005-05-12 A complete introduction to partial differential equations this is a textbook aimed at students of mathematics physics and engineering

As recognized, adventure as competently as experience very nearly lesson, amusement, as capably as arrangement can be gotten by just checking out a book **Partial Differential Equations An Introduction** in addition to it is not directly done, you could say you will even more nearly this life, on the order of the world.

We allow you this proper as skillfully as easy pretentiousness to acquire those all. We have enough money Partial Differential Equations An Introduction and numerous book collections from fictions to scientific research in any way. in the midst of them is this Partial Differential Equations An Introduction that can be your partner.

Partial Differential Equations An Introduction Introduction

In today's digital age, the availability of Partial Differential Equations An Introduction books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Partial Differential Equations An Introduction books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Partial Differential Equations An Introduction books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Partial Differential Equations An Introduction versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Partial Differential Equations An Introduction books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Partial Differential Equations An Introduction books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Partial Differential Equations An Introduction books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow

digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Partial Differential Equations An Introduction books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Partial Differential Equations An Introduction books and manuals for download and embark on your journey of knowledge?

FAQs About Partial Differential Equations An Introduction Books

1. Where can I buy Partial Differential Equations An Introduction books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Partial Differential Equations An Introduction book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Partial Differential Equations An Introduction books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.

6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Partial Differential Equations An Introduction audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Partial Differential Equations An Introduction books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
