industrial community as is automation Thus the title of this conference proceedings volume Flexible Automation reflects an
added emphasis to the usual industrial automation As with general automation that has impacted every component of the
manufacturing office and plant the identity of flexible automation can possess various forms and functions The papers in this
volume have been grouped into two main categories One category deals with implementation of so called intelligent
manufacturing This means use of algorithmic methods and artificial intelligence approaches to various problems encountered
in practical factory automation tasks The placement of papers into five chapters of this part cannot be very precise due to
multidisciplinary nature and constant rapid change of the field The categories are arranged starting from problems of
enhancement of current factory settings and followed by the papers addressing more specific issues of production planning
process technology and product engineering The fifth chapter contains papers on the very important aspects of factory
automation problems of design simulation operation and monitoring of manufacturing cells **Machinery and Production
