## **Mobilizing For Democracy Comparing 1989 And 2011:**

*Mobilizing for Democracy* Donatella della Porta, 2014-03 *Mobilizing for Democracy* compares two waves of protests for democracy in Central Eastern Europe in 1989 and in the Middle East and North Africa in 2011 *Labour Mobilization, Politics and Globalization in Brazil* Marieke Riethof, 2018-05-15 This book analyses the conflicts that emerged from the Brazilian labour movement's active participation in a rapidly changing political environment particularly in the context of the coming to power of a party with strong roots in the labour movement. While the close relations with the Workers Party PT have shaped the labour movement's political agenda its trajectory cannot be understood solely with reference to that party's electoral fortunes. Through a study of the political trajectory of the Brazilian labour movement over the last three decades the author explores the conditions under which the labour movement has developed militant and moderate strategies **Young**

**People and the Politics of Outrage and Hope**, 2018-11-26 *Young People and the Politics of Outrage and Hope* brings together contributions from international youth studies experts who ask how young people and institutions are responding to high levels of unemployment student debt housing costs that lock many out of home ownership and the challenge to find meaningful modes of participation in neo liberal social contexts. Contributors including Henry Giroux Anita Harris and Judith Bessant draw on a range of theoretical methodological and empirical work to identify and debate some of the challenges and opportunities of the politics of outrage and hope that should accompany academic community and political discussions about the futures that young people will inherit and make. *Young People and the Politics of Outrage and Hope* is now available in paperback for individual customers *Protest Publics* Nina Belyaeva, Victor Albert, Dmitry G. Zaytsev, 2019-05-10 This book examines the waves of protest that broke out in the 2010s as the collective actions of self organized publics. Drawing on theories of publics counter publics and developing an analytical framework that allows the comparison of different country cases this volume explores the transformation from spontaneous demonstrations driven by civic outrage against injustice to more institutionalized forms of protest. Presenting comparative research and case studies on e.g. the Portuguese Generation in Trouble the Arab Spring in Northern Africa or Occupy Wall Street in the USA the authors explore how protest publics emerge and evolve in very different ways from creating many small citizen groups focused on particular projects to more articulated political agendas for both state and society. These protest publics have provoked and legitimized concrete socio political changes altering the balance of power in specific political spaces and in some cases generating profound moments of instability that can lead both to revolutions and to peaceful transformations of political institutions. The authors argue that this recent wave of protests is driven by a new type of social actor self organized publics. In some cases these protest publics can lead to democratic reform and redistributive policies while in others they can produce destabilization ethnic and nationalist populism and authoritarianism. This book will help readers to better understand how seemingly spontaneous public events and protests evolve into meaningful well structured collective action and come to shape political processes in

diverse regions of the globe     **Network Mobilization Dynamics in Uncertain Times in the Middle East and North Africa** Frédéric Volpi, Janine A. Clark, 2020-06-29 This comprehensive volume investigates the dynamics of mobilization and demobilization of social networks before, during and after episodes of political turbulence in the Middle East region focusing particularly on the 2011 Arab uprisings. The authors consider important questions regarding agency, strategic action and institutional outcomes that have significance for social mobilization, social movements and authoritarian governance. This collection proposes an interactive perspective linking up contentious politics with routine governance through a dynamic articulation of repertoires of contention. The authors use a micro mobilization perspective to frame the different trajectories of protest networks in times of uncertainty. They place the interactions between grassroots activists, structured organizations and state actors at the centre of the explanation of change and stability in the recent mobilizations of the region. By starting with descriptions of interactions at the grassroots level, the authors then explain macro level dynamics between networks and other players including the state. This book was originally published as a special issue of the journal *Social Movement Studies*.

**Social Mobilization Beyond Ethnicity** Chiara Milan, 2019-11-20 This book offers an in-depth investigation of the emergence and spread of social mobilizations that transcend ethnicity in societies violently divided along ethno-national lines. Using Bosnia Herzegovina as a case study, the book explores episodes of mobilization which have superseded ethno-nationalist cleavages. Bosnia Herzegovina emerged from the 1992-95 war, brutally impoverished and deeply ethnically divided, representing a critical and strategic case for the examination and understanding of the dynamics of mobilization in such divided societies. Despite difficult circumstances for civic-based collective action, social mobilizations in the country have grown in size, number and intensity in recent years. Marked by citizen demand for accountable governance, responsive urbanism and access to basic human rights, these protests have been driven by economic, social and political problems which cut across religious and ethnic divides. Examining the variation in spatial and social scale of contention, the book investigates movements' formation, their organizational structures and networking strategies, and advances research on divided societies and social movements. This volume will be of interest to scholars and researchers of Southeastern Europe and those examining political dissent, social movements and mobilization in divided societies, as well as practitioners in civil society, grassroots groups and political activists.

**The People and the State** Thomas O'Brien, 2017-08-09 Protest has proliferated in the early part of the twenty-first century, forcing change in political systems and challenging established patterns of behaviour. The factors driving these protests range from religion and inequality through to the effectiveness of the state and its role in protecting the rights of citizens. The growth in discontent represented by these protests potentially threatens the stability of the state by raising questions about the right of governments to govern. Anger and frustration embodied in many of these actions has resulted in the growth of support for populist political actors promising simplified solutions to the complex underlying issues. In this way, the inability of the state to address the claims of its population potentially places its

continued viability at risk The cases in this collection examine a range of protest movements from around the world in both democratic and authoritarian political systems to provide an overview of contemporary issues and protest forms Addressing contemporary protest in this manner is an important task in supporting our understanding of the root causes of the current tensions and their possible future effects This book is a compilation of articles from a special issue of *Contemporary Social Science* with additional papers selected from *Contemporary Politics* *Journal of Contemporary China* and *Democratization*

*Social Movements and Civil War* Donatella della Porta, Teije Hidde Donker, Bogumila Hall, Emin Poljarevic, Daniel P. Ritter, 2017-07-20 This book investigates the origins of civil wars which emerge from failed attempts at democratization The main aim of this volume is to develop a theoretical explanation of the conditions under which and the mechanisms through which social movements struggles for democracy end up in civil war While the empirical evidence suggests that this is not a rare phenomenon the literatures on social movements democratization and civil wars have grown apart from each other At the theoretical level *Social Movements and Civil War* bridges insights in the three fields looking in particular at explanations of the radicalization of social movements the failure of democratization processes and the onset of civil war In doing this it builds upon the relational approach developed in contentious politics with the aim of singling out robust causal mechanisms At the empirical level the research provides in depth descriptions of four cases of trajectory from social movements for democratization into civil wars in Syria Libya Yemen and the former Yugoslavia Conditions such as the double weakness of civil society and the state the presence of entrepreneurs of violence as well as normative and material resources for violence ethnic and tribal divisions domestic and international military interventions are considered as influencing the chains of actors choices rather than as structural determinants This book will be of great interest to students of civil wars political violence social movements democratization and IR in general

**Non-Western Social Movements and Participatory Democracy** Ekim Arbatli,Dina Rosenberg,2017-03-02 This book

analyzes social movements across a range of countries in the non Western world Bosnia Brazil Egypt India Iran Palestine Russia Syria Turkey and Ukraine in the period 2008 to 2016 The individual case studies investigate how political and social goals are framed nationally and globally and the types of mobilization strategies used to pursue them The studies also assess how in the age of transnationalism the idea of participatory democracy produces new collective action frames and mass mobilization strategies The book challenges the view that most social movements unequivocally seek to achieve higher levels of democratization Instead the authors argue that protesters across different movements advocate more involved forms of citizen participation since passive representation through liberal democratic institutions fails to address mass grievances and demands for accountability in many countries **Spreading Protest** Donatella della Porta ,Alice Mattoni,2014-08-15 Which elements do the Arab Spring the Indignados and Occupy Wall Street have in common How do they differ What do they share with social movements of the past This book discusses the recent wave of global mobilisations from an unusual angle explaining what aspects of protests spread from one country to another how this happened and why diffusion occurred in certain contexts but not in others In doing this the book casts light on the more general mechanisms of protest diffusion in contemporary societies explaining how mobilisations travel from one country to another and also from past to present times Bridging different fields of the social sciences and covering a broad range of empirical cases this book develops new theoretical perspectives **Understanding Protest Diffusion** Arne F. Wackenhet,2020-02-05 This book traces the mobilization process leading up to the January 25 Uprising and furthers our understanding of the largely unexpected diffusion of protest during this Egyptian Revolution Focusing on the role of the so called Cairo based political opposition this study strongly suggests a need to pay closer attention to the complexity and contingent nature of such large scale protest episodes Building on interviews with activists employees of NGOs in the human rights advocacy sector and journalists this in depth single case study reveals how different movement organizations in the Egyptian prodemocracy movement had long and largely unsuccessfully tried to mobilize support for socio political change in the country Against this backdrop the book illustrates how a coalition of activists sought to organize a protest event against police brutality in early 2011 The resulting protests on January 25 surprised not only the regime of Hosni Mubarak but also the organizers
