Security Compliance in Model-driven Development of Software Systems in Presence of Long-Term Evolution and Variants Sven Matthias Peldszus,2022-07-13 For ensuring a software system s security it is vital to keep up with changing security precautions attacks and mitigations Although model based development enables addressing security already at design time design models are often inconsistent with the implementation or among themselves An additional burden are variants of software systems To ensure security in this context we present an approach based on continuous automated change propagation allowing security experts to specify security requirements on the most suitable system representation We automatically check all system representations against these requirements and provide security preserving refactorings for preserving security compliance For both we show the application to variant rich software systems To support legacy systems we allow to reverse engineer variability aware UML models and semi automatically map existing design models to the implementation Besides evaluations of the individual contributions we demonstrate the approach in two open source case studies the iTrust electronics health records system and the Eclipse Secure Storage **Modern Software Engineering Methodologies for Mobile and Cloud Environments** Rosado da Cruz, António Miguel,2016-01-20 As technology continues to evolve the popularity of mobile computing has become inherent within today s society With the majority of the population using some form of mobile device it has become increasingly important to develop more efficient cloud platforms Modern Software Engineering Methodologies for Mobile and Cloud Environments investigates emergent trends and research on innovative software platforms in mobile and cloud computing Featuring state of the art software engineering methods as well as new techniques being utilized in the field this book is a pivotal reference source for professionals researchers practitioners and students interested in mobile and cloud environments Building Bridges: HCI, Visualization, and Non-formal Modeling Achim Ebert,Gerrit C. van der Veer,Gitta Domik,Nahum D.
