*An Agri-Business model to create uses for tomato crop farmers in Rwanda* Leonidas Maniraho,2022-10-10 Master s Thesis from the year 2021 in the subject African Studies Culture and Applied Geography grade 1 language English abstract The goal of this research is to create an agri business model to create uses for tomato crop farmers in Rwanda This study places special focus on addressing the lack of value addition in tomato crop farm leftovers and investigates the current state of farm leftover utilization as a method of dealing with tomato cultivation difficulties as well as related issues The research study used an exploratory mixed method research design and the researcher interviewed and surveyed specified and identified tomato farmers as well as trainers lecturers and other who are involved in horticulture sector using structured instrument validated from previous pilot study A total of 64 individuals were selected Respondents recorded transcribed and verified the interview data for the research The data was subsequently analyzed using NVIVO12 analytic software which resulted in the establishment of data driven prominent themes and in inclusion of important themes while the survey data from the spreadsheet was in conversion model to provide statistical data As a result agricultural farm leftovers are produced in significant numbers each year The most frequent crop farm wastes are stems and leaves although roots may also be discovered in tomato fields The bulk of tomato crop residue is allowed in fields to decay naturally while some are kept for

mulch and animal feed. The study's findings indicated that farmers make no more money no matter what they do with tomato crop farm leftovers. Composting can generate some income for them but it is not done properly. The major reasons for tomato crop farm leftovers not being turned into other valuable crop based goods include farmers lack of knowledge and skills in tomato crop value addition as well as a lack of farmer academia collaboration. The technical requirements revealed in the results are mentorship and training in value addition particularly in tomato residue value added as well as training of trainers in modern farming. However, compost manufacturing value chain development, modern farming technologies post harvest technology and handling and value addition are the most important for tomato farmers. These findings fuelled the development of several options but the construction of a farmer field school for composting tomato crop farm leftovers was the most conservative, safe and risk averse option as an agribusiness model for collaboration. *The Journal of Canadian Petroleum Technology*, 2008. *Computing Newsletter for Schools of Business*, 1980. **Purchasing**, 1955. **CIO**, 2007.

Occupational Analysis, Techniques & Procedures Verne Charles Fryklund, 1970. Cornell University Courses of Study Cornell University, 1996. Leading with AI and Analytics Eric T. Anderson, Florian Zettelmeyer, 2022. Data is the benchmark that informs corporate projections, decision making and analysis. But why do many organizations that see themselves as data driven fail to thrive? In *Leading with AI and Analytics*, two renowned experts from the Kellogg School of Management show business leaders how to transform their organization to become evidence driven, which leads to real measurable changes that can help propel their companies to the top of their industries. The availability of unprecedented technology enabled tools has made AI Artificial Intelligence an essential component of business analytics. But what's often lacking are the leadership skills to integrate these technologies to achieve maximum value. Here the authors provide a comprehensive game plan for developing that all important human factor to get at the heart of data science: the ability to apply analytical thinking to real world problems. Each of these tools and techniques comes to powerful life through a wealth of powerful case studies and real world success stories. In this book you'll find the essential tools to help you develop a strong data science intuition, quotient, lead and scale AI and analytics throughout your organization, move from best guess decision making to evidence based decisions and craft strategies and tactics to create real impact. *The Accounting Review* William Andrew Paton, 1962. Includes section Reviews. Bookseller, Newsdealer and Stationer, 1897.
