## **The Formulas of Popular Fiction** Anna

Faktorovich, 2014-09-22 This book creates a taxonomy for the major bestselling fictional genres: romance, e.g. authors Heyer, Cartland, Woodiwiss and Roberts; religious and inspirational; Corelli and Douglas; mystery and detective; Conan Doyle, Christie and Mankell; and science fiction, horror and fantasy. Wells, Tolkien, Orwell, Niven, King and Rowling. Chapters look at a genre from its roots to its most recent works. The structural patterns in the plot, characters and setting of these genres are then explained. The book also provides a critique of currently popular hyper formulaic, hack, unliterary writings that have multiplied in recent decades. Special topics such as the publishing oligopoly and the resulting homogeneity among bestselling works and the steady movement from literary to unliterary fiction are also examined

**Methodological Naturalism and Planetary Humanism: A Worldview for the 21st Century** Guido O. Perez, MD, 2011-09-30 This book reviews a Naturalistic worldview based on a scientific understanding of the world and the broad perspective of cosmic evolution. We are the product of a long evolutionary process that has been marked by four pivotal events: the Big Bang, the appearance of life, the emergence of mind and the evolution of culture. The issue of whether or not the universe had a beginning remains undefined.

The origin of life from inanimate matter also remains undefined but the evolution of life forms by natural selection is supported by many lines of evidence. The origin of mind and consciousness can be traced to the evolution of neurons in multicellular animals. These cells have numerous extensions capable of forming connections and influencing the function of distantly located cells. Most scientists adopt a monist physicalist view and reject the existence of substance dualism. Evolutionary psychology holds that human nature is the result of our genes and their interaction with the environment. Aided by their superior cognitive abilities and by the transmission of knowledge, modern humans have created a rich culture. Because we can not prove that everything is physical, it is better to reject Ontologic Naturalism and embrace Methodological Naturalism. This worldview has an ethical, social, and political dimension best described by Planetary Humanism, a form of humanism that is not anthropocentric and is global and ecologic in scope.

### **How to Become Famous**

Cass R. Sunstein, 2024-05-21. Fame is like lightning. Taylor Swift, Bob Dylan, Leonardo da Vinci, Jane Austen, Oprah Winfrey, all of them were struck. Why? What if they hadn't been? Consider the most famous music group in history. What would the world be like if the Beatles never existed? This was the question posed by the playful thought provoking 2019 film Yesterday in which a young, completely unknown singer starts performing Beatles hits to a world that has never heard them. Would the Fab Four's songs be as phenomenally popular as they are in our own Beatle infused world? The movie asserts that they would, but is that true? Was the success of the Beatles inevitable due to their amazing, matchless talent? Maybe. It's hard to imagine our world without its stars, icons, and celebrities. They are part of our culture and history, seeming permanent and preordained. But as Harvard law professor and passionate Beatles fan Cass Sunstein shows in this startling book, that is far from the case. Focusing on both famous and forgotten, or simply overlooked, artists and luminaries in music, literature, business, science, politics, and other fields, he explores why some individuals become famous and others don't, and offers a new understanding of the roles played by greatness, luck, and contingency in the achievement of fame. Sunstein examines recent research on informational cascades, network effects, and group polarization to probe the question of how people become famous. He explores what ends up in the history books and in the literary canon, and how that changes radically over time. He delves into the rich and entertaining stories of a diverse cast of famous characters from John Keats, William Blake, and Jane Austen to Bob Dylan, Ayn Rand, and Stan Lee, as well as John Paul, George, and Ringo. How to Become Famous takes you on a fun, captivating, and at times, profound journey that will forever change your perspective on the latest celebrity's fifteen minutes of fame and on what vaults some to the top and leaves others in the dust.

Elliott, 2007 Learning mathematics is the central goal of mathematics education yet it is the least frequently addressed of NCTM's Principles and Standards. With an increasing population of English language learners and the inclusion of students with learning disabilities into the regular mathematics classroom how can all the differentiated needs be met in one classroom? What is the balance between focusing on developing concepts and memorisation of certain facts and rules? The Learning of Mathematics NCTM's sixty ninth yearbook furthers the discourse on learning with five main areas: how students learn, students learning in school contexts, measuring and interpreting, students learning, teachers learning of mathematics and reflections on mathematics teaching and learning. **Journal of Education**, 1888 **Actes Du ... **Timing the Future Metropolis** Peter Ekman, 2024-11-15 Timing the Future Metropolis an intellectual history of planning, urbanism, design and social science explores the network of postwar institutions formed amid specters of urban crisis and renewal that set out to envision the future of the American city. Peter Ekman focuses on one decisive node in the network the Joint Center for Urban Studies founded in 1959 by scholars at Harvard and MIT. Through its sprawling programs of organized research its manifold connections to universities, foundations, publishers and policymakers and its years of consultation on the planning of a new city in Venezuela Ciudad Guayana the Joint Center became preoccupied with the question of how to conceptualize the urban future as an object of knowledge. Timing the Future Metropolis ultimately compels a broader reflection on temporality in urban planning rethinking how we might imagine cities yet to come and the consequences of deciding not to. **The Meeting Professional**, 2008 **QST.**, 1969 **Celebrate Life!** Sharon Murphy, 1992
