How to Talk to Data Scientists Jeremy Elser, 2021-08-05 Every major company has or will soon have a data science program Most fail expensively imperiling their executive sponsors Unfortunately executives have been misled to focus on the latest buzzwords Although buzzwords change big data data

science machine learning deep learning and artificial intelligence the distraction from fundamentals manifests as a predictable trajectory from exuberant program launch to stagnation to awkward decommissioning After architecting data science programs at over a dozen companies across sectors and scales Dr Elser has formulated a reliable framework for successful data science programs Surprisingly software and algorithms are secondary Rather the key is understanding how the available data aligns to the problem to be solved The business executive understands the problem sufficiently to enforce this alignment while data scientists act on it But executives tend to underestimate their role and thereby fail to construct the necessary connective tissue with their data scientists This book provides business executives with a concrete exercise populating a Master Table accessible to nontechnical managers and data scientists which serves as the connective tissue between them Rather than teach a diluted version of data science this book describes how to start projects and how to detect and fix problems the moments when leadership is critical Insights are provided through real world examples including a Playbook featuring common projects The intended audience is executives C suite through VP However ambitious mid level managers and data scientists will also benefit
