Animal Health and Production: Identifying Challenges and Finding a Way Forward Izhar Hyder Qazi, Yangchun Cao, Jesus R. Requena, 2025-11-24

It has been said that the difficulty with predicting the future is that uncertainty seems to increase exponentially with the number years in the future simply because we can't predict technology let alone geopolitical upheavals By the year 2050 our world will grow to 10 billion people and we need to feed them with shrinking resources At the same time we must take into consideration that global warming will have a profound impact on the animal production systems in coming decades if no timely measures are adopted to address this pressing issue These issues desperately need to be addressed and certainly solutions to these pressing problems will be intertwined as we strive to feed a growing population while building sustainable and efficient food systems Clearly health is at the heart of the sustainable animal production systems therefore optimizing the animal health and mitigating the stresses of pathogen and production related diseases is also essential It is now well established that animals are more susceptible to diseases when they are kept under stressful environments Therefore improved animal management systems focusing on disease prevention are essential for optimized production of animals In addition it has been said that over 60% of pathogens that cause human diseases originate from domestic or wild animals therefore protecting the health of animals and the environment protects human health Moreover antimicrobial resistance AMR has been regarded one of the most pressing health issues of the present time and as well as is a growing threat to livelihoods and global food security It is daunting to even imagine a world where there is almost no cure for diseases in humans animals and plants This worst case scenario might turn out to be a reality as pathogenic microbes develop resistance to the antimicrobial arsenals that are used to combat them The societal demand regarding public health zoonoses AMR etc welfare and sustainability i.e feed efficiency methane emission is also increasing The good news is that solutions do exist and the quest for efficient production systems intelligent breeding improved nutrition viable diagnostic methods tailored made biosecurity procedures and integrated health and welfare management is ongoing with the scientific community and industry Fittingly it has been said that all of the world's big problems are multidisciplinary in nature therefore the present day animal scientists and veterinary researchers must break their expertise based cocoons and work in a collaborative manner to sustainably meet the

on going and future increasing demand of animal source foods and to ensure good health of animals Finally as we search for quantum leaps in productivity novel and innovative technological solutions need to be put in the practice to achieve these envisaged goals 1 Studies focused on sustainable animal production particularly those centred on the principle of clean green and ethical animal management systems 2 Disease management including transboundary diseases zoonoses of course and control strategies 3 Studies focusing on alternatives to antibiotic use in animal health and production systems and mitigation of AMR threat 4 Mechanistic studies focused on the host pathogen interactions 5 Practice and the development of novel and classical therapeutics aimed at improving health and production 6 Studies using innovative technological and bioinformatic tools to address the pressing issues relevant to animal health and production 7 Studies focused on bringing the animal production systems on the path to climate neutrality

This Research Topic covers some of the latest research on brain and behavior in health and disease in Africa With its untapped resources and unique situations Neuroscience in Africa has the potential to contribute to a better understanding of human brain function both in health and disease The diverse African fauna display a range of specializations in brain structure function relationships as a result of adaptations to the environment Exploration of these may lead to insights into coping strategies which could be extrapolated to humans Africa's unique flora is being investigated for anti inflammatory antinociceptive antioxidant antiepileptogenic and neuroprotective properties to determine its potential for use in the treatment of human brain disorders There is also research on neurodegenerative and infectious diseases not only common to the global world but also neglected tropical diseases and conditions which provide unique avenues of investigations in basic and translational neuroscience on highly debilitating disorders and on the effects of pathogens and environmental toxins

Advances and Challenges in Nanomedicine Susan Hua,Sherry Y. Wu,2019-02-28

Nanotechnology is a multidisciplinary field that is revolutionizing the way we detect and treat damage to the human body Nanomedicine applies nanotechnology to highly specific medical interventions for the prevention diagnosis and treatment of diseases They are increasingly being used to overcome biological barriers in the body to improve the way we deliver compounds to specific tissues and organs In particular nanomedicines have been shown to be beneficial for stabilizing therapeutic compounds overcoming obstacles to cellular and tissue uptake and improving biodistribution of compounds to target sites *in vivo* Nanomedicines have demonstrated significant therapeutic advantages for a multitude of biomedical applications however the clinical translation of these nanotechnology platforms has not progressed as quickly as the plethora of positive results would have suggested Understanding the advances in nanomedicine to date and the challenges that still need to be overcome will allow future research to improve on existing platforms and to address the current translational and regulatory limitations This eBook Advances and Challenges in Nanomedicine has brought together experts in the fields of

nanomedicine nanotechnology nanotoxicology pharmaceutics manufacturing and translation to discuss the application of nanotechnology to drug delivery This information is presented as original research opinion perspective and review articles The goal of this eBook is to generate collaborative discussion on the current status general trends challenges strategies and future direction of pharmaceutical nanotechnology as well as highlight current and emerging nanoparticulate platforms with potential medical applications
