problem with laptops is that they have weaker specs compared to the usual and bulkier desktop PC rigs. In terms of hardware, the laptops pale in comparison to desktop PCs. This includes hard drive, RAM, graphics cards, external device support, monitor size and quality, and even the keyboard layout. For software, it depends as you can get software upgrades right from the get go when you buy your laptop or from the updates that the manufacturer releases a few times every month. The bottom line is that laptops are not meant for gaming; they're more geared for working and surfing the Internet, but is that going to stop you from PC gaming? Well, it shouldn't. Sure, laptops are more of a worker's haven since laptops are meant to be placed on your lap, be brought almost anywhere, and let you work anytime and anywhere that you prefer. This includes writing, making presentations, creating websites, coding, and such things. But from time to time, you need to have a break or two from work. Gaming on your laptop is still possible. Getting geared properly to get your game on your laptop is crucial if you want to play PC games on your mobile PC. And in this book, we'll be teaching you on how to properly gear up, set up, and equip your laptop with the proper hardware, software, and accessories to make your laptop outshine the rest of the competition in the market when it comes to PC gaming. Oh, and we're not just talking about the classic PC games that run with mediocre requirements and low hardware specs. We're talking about PC games from the past up to the latest PC games that demand only the best. If you want to play the latest and the best PC games out today, you need to know what to get and how to get it when it comes to gaming on your laptop. Gaming Laptop Handbook John William, PH D, 2021-03-16. What is Gaming Laptop? A gaming computer is a desktop that is often custom-built for the purpose of increasing performance in modern computer games. They may require an increase in graphical and processing power. Gaming computers have video cards with their own dedicated RAM, processor, and cooling system. A gaming laptop is one used primarily for the purpose of playing computer games. Unlike conventional laptops, they have higher-end graphics cards that are not integrated or designed to conserve battery power. Well, with gaming laptops, it's a bit more expensive, and you'll find the extra bucks spent on substitutes. Think of their incredible designs, lovely desktop-grade gaming workstations, and a more diverse gaming experience in a compact package.
