So you want to get ready for the mobile web? Congratulations!

- But mobile development raises a lot of questions which have no quick answers. Questions like,
- Should you go with a native app, or should you go cross platform with a hybrid app or a responsive HTML5 website?
- Should you focus on only one platform (iOS, Android etc) or should you go with a cross platform approach?
- How would the new enterprise app interact with your existing IT assets like databases and corporate networks?
- How would you deal with user data? Should it be stored on the cloud or on the device?
- How can you make the user experience optimal and contextual?
- Get any one of these answers wrong and you are looking at a failed project.
