Mobility Data Management And Exploration:

Mobility Data Management and Exploration Nikos Pelekis, Yannis Theodoridis, 2014-07-08 This text integrates different mobility data handling processes from database management to multi dimensional analysis and mining into a unified presentation driven by the spectrum of requirements raised by real world applications. It presents a step by step methodology to understand and exploit mobility data collecting and cleansing data storage in Moving Object Database MOD engines indexing, processing, analyzing and mining mobility data. Emerging issues such as semantic and privacy aware querying and mining as well as distributed data processing are also covered. Theoretical presentation is smoothly interchanged with hands on exercises and case studies involving an actual MOD engine. The authors are established experts who address both theoretical and practical dimensions of the field but also present valuable prototype software. The background context, clear explanations and sample exercises make this an ideal textbook for graduate students studying database management, data mining and geographic information systems.

[Distributed and Parallel Architectures for Spatial Data](#) Alberto Belussi, Sara Migliorini, 2021-01-20 This book aims at promoting new and innovative studies proposing new architectures or innovative evolutions of existing ones and illustrating experiments on current technologies in order to improve the efficiency and effectiveness of distributed and cluster systems when they deal with spatiotemporal data.

Exploring Services Science Henrique Nóvoa, Monica Drăgoicea, 2015-01-06 This book contains the refereed proceedings of the 6th International Conference on Exploring Service Science (IESS) held in Porto, Portugal in February 2015. Service science constitutes an interdisciplinary approach to systematic innovation in service systems integrating managerial, social, legal and engineering aspects to address the theoretical and practical challenges of the service industry and its economy. The 27 full papers accepted for IESS were selected from 69 submissions. The papers consider the topics service innovation, service exploration, service design, IT based service engineering and service sustainability.

Exploring Ethical Dimensions of Environmental Sustainability and Use of AI Kannan, Hemachandran, Rodriguez, Raul Villamarin, Paprika, Zita Zoltay, Ade-Ibijola, Abejide, 2023-12-07 Exploring Ethical Dimensions of Environmental Sustainability and Use of AI is a comprehensive and insightful book that delves into the ethical implications and challenges that emerge at the intersection of environmental sustainability and the utilization of artificial intelligence (AI). With a focus on key ethical dimensions such as transparency, equity, privacy, autonomy, unintended consequences, and trade-offs, this book aims to provide a thorough understanding of the responsible deployment and development of AI in the realm of environmental sustainability. By addressing the ethical aspects and challenges involved, this book contributes to the development of ethical guidelines and frameworks that align AI technologies with the vision of a sustainable and equitable future. Researchers will find immense value in this book as it offers a holistic exploration of the ethical implications, filling a critical gap in the existing literature. Policymakers can gain valuable insights to inform the creation of ethical guidelines and regulations governing AI use in

sustainable initiatives Practitioners including professionals working in environmental organizations or technology companies will acquire practical knowledge to guide their decision making and implementation of AI driven solutions
