WiMAX World Interoperability for Microwave Access is one of the greatest technologies in the communication area. WiMAX has been used widely in telecommunication for long distance communication. From this point this paper will explore four important sections related to this technique. Firstly it will discuss the performance conduct of the WiMAX as compared to that of Wi-Fi. Secondly it will critically evaluate the current solutions for the security problems in WiMAX network. Thirdly it will attempt to design a new method to improve the security performance of WiMAX network. Fourthly it will provide a security system that can be applied in real life applications to support the security performance of WiMAX network.
