Amelia Green, AI, 2025-02-21 Scaling Success offers entrepreneurs and managers vital strategies for transforming small projects into large scale operations. The book emphasizes the need for strategic planning, operational efficiency, and leadership development, addressing common pitfalls that can hinder innovation and profitability during scaling. It highlights that poorly managed scaling can lead to decreased quality and reduced customer satisfaction, ultimately impacting business success. The book takes a holistic approach, integrating strategic vision with operational excellence and effective leadership. It argues that sustainable growth is not just about increasing revenue but about building a resilient organization that adapts to market conditions while maintaining core values. Using empirical research, case studies, and expert interviews, the book progresses through sections on strategic planning, market analysis, competitive positioning, financial forecasting, operational efficiency, process optimization, supply chain management, technology adoption, and leadership development, team building, communication strategies, and organizational culture. The book culminates with practical applications and actionable strategies for implementation. It uniquely emphasizes the importance of organizational culture in scaling, showcasing how a strong values-driven culture can be a competitive advantage. By blending academic rigor with real world examples, Scaling Success provides accessible and practical guidance for navigating the complexities of business growth and business management.

Impact of Influencer Marketing on Young Women's Customer Experience on Cosmetic Products Jule Prescher, 2023-06-06 Bachelor Thesis from the year 2023 in the subject Communications Multimedia Internet New Technologies grade 1 3 University of applied sciences Cologne language English abstract This thesis aims to realize how influencer marketing performs and its impact on the Cx Therefore the research addresses the following questions How powerful are influencers these days What is different about influencer marketing and why is it a successful strategy How do people perceive information shared by influencers and which factors are decisive for potential customers to purchase products advertised by influencers What impact does an influencer have on the overall Cx The internet has been fully integrated into people s daily

lives worldwide over the past years. The percentage of the world's population with access to the internet has doubled from 32% in 2011 to 63% in 2021. 90% of people from developed countries access the internet in 2021. At the same time the number of social network users is increasing. These networks have the purpose of connecting with friends. In 2022, 5 billion people have access to the internet worldwide and 4.7 billion people use social media. SM. Ultimately, 93% of those with internet access own at least one SM account, that is more than half the population worldwide. Through time, companies found new marketing strategies which reached active people on SM. These platforms are necessary to reach Generation Z people born in the late 1990s. They are different and cannot be reached in the same way as they watch Netflix instead of TV or listen to Spotify instead of the radio. For example, Influencer marketing became a 10 billion industry in 2020. Influencers share their lives on SM networks. Due to their high reach, they receive offers from companies for cooperation. Influencers' followers admire and trust their recommendations due to their personal and authentic representation. While advertising products, influencers show how to use them, where to buy them, and give their opinion. For higher sales, influencers often receive promo codes for a discount or free products for each order.

Transformation of conventional Banking. Opportunities and risks of Fintech companies in Asset Management Gleb Romanchuk, 2019-05-03 Master's Thesis from the year 2019 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1.3 Berlin School of Economics and Law language English abstract. The purpose of this work was to find out whether Fintechs are able to compete with Banks in the field of Asset Management. Companies providing Robo Advisory services are considered to be the banks of the future. Several interviews with companies working in this field have been conducted to investigate if the algorithms are prepared for the next financial crash. This work contains 7 chapters starting with the motivation and research question. Secondly, the general situation on the market will be described including the changes of customer behavior. This serves the purpose to give an understanding about the current market conditions. Thirdly, the banking sector will be described considering definitions and regulations. In this work, the focus will be on the German market, therefore consumer behavior and details about the German retail banking industry are relevant. Subsequently, chapter 4 deals with asset management and the new trends in the industry. Chapter 5 describes the development of the fintech industry. Definitions and regulations of the fintech companies are part of this chapter. In chapter 6, the scientific investigation will be conducted and presented. The results will show how stable the new technologies are in order to give an outlook for the future. In the next chapter, Prospects for the future of retail banking and especially asset management will be mentioned. In chapter 7, General current trends and forecasts are also part of this chapter. Since only limited literature is available about the fintech industry and especially robo advisory, the investigation part includes a qualitative approach with interviews that have been conducted with qualified specialists that work or research in the robo advisory industry. The question of whether and how the robo advisors will survive the next financial crisis is topic of the interviews. There has been no financial crisis that might have caused unforeseen problems for the

systems ever since the creation of robo advisory. Thus it is unknown how those technologies will react to chaotic market situations. The idea was to ask companies to what extent they are prepared for a financial crisis. The findings of this investigation will deal with the possible future outline of those fintechs providing algorithm based asset management. The question about the security framework has been answered with a view to examining the future development of the robo advisory industry.
