Extinction Governance, Finance and Accounting Jill Atkins, Martina Macpherson, 2022-05-29 The planet is currently experiencing a mass extinction event with human and business activity being the root cause of species loss and habitat destruction. Industries, companies, banks, investors, accountants, and auditors have all played their role. This book explores how they can also provide a solution. The book presents plans, metrics, frameworks, mechanisms, and financial innovations that can be and are being implemented through the financial markets in order to save and protect species, enhance biodiversity, and at the same time preserve the financial markets and the business world. This biodiversity handbook addresses the intersection between species extinction and the global capitalist system. With contributions from leading non-governmental organisations such as the Capitals Coalition, Business for Nature, the Ecojustice Foundation, ShareAction, and the Endangered Wildlife Trust, plus senior researchers in the field as well as industry experts from Moody's, EOS at Hermes Federated Investment Management, BlueBay Asset Management, ODDO BHF Asset Management, and OSSIAM to mention just a few, this book is at the forefront of addressing the crucially important topics of extinction, accounting, finance, and governance. Drawing on leading research, the book is written in an accessible style and is relevant to researchers and students in the fields of sustainability, governance, accounting, finance, corporate social responsibility, and corporate governance. It is essential reading for investors, responsible investors, bankers, business leaders, and policy makers in the field of sustainable financial markets. Given the interdisciplinary nature of this book, it is useful to conservationists, ecologists, and others involved in species and biodiversity protection.

Handbook of Research on Heritage Management and Preservation Ngulube, Patrick, 2018-02-02 Archives, museums, and libraries are pivotal to the management and preservation of any society's heritage. Heritage assets should be systematically managed by putting in place proper policies, maintenance procedures, security and risks measures, and retrieval and preservation plans. The Handbook of Research on Heritage Management and Preservation is a critical scholarly resource that examines different aspects of heritage management and preservation, ranging from theories that underline the field areas of convergence and divergence in the field, infrastructure, and the policy framework that governs the field and the influence of the changing landscape on practice. Featuring coverage on a broad range of topics such as community involvement, records, legislation, and collection development, this book is geared towards academicians, researchers, and students seeking current research on heritage management and preservation.
