New Postcom Equipment Company:

China's Integration Into the World Economy John Whalley, 2011 This book discusses China's integration into the world economy drawing on papers previously written by the editor. It focuses on strong trade growth, FDI inflows, innovation policy, including transfer of technology and intellectual property, the role of saving and the accumulation of human capital. It also analyzes the quantitative significance of openness in driving China's growth. While other books on China do not focus much on China's integration into the world economy, this book provides technically strong analyses of key contributing factors to China's growth performance. It also highlights innovation and education policy and their significance for the 11th five year plan which aims to quadruple real income per capita between 2000 and 2020.
