Legaspi,2001 [Transition Management for Sustainable Development](#) Kazuhiro Ueta,Yukio Adachi,2014 The idea of sustainable development is often referred to in the public forum however this does not necessarily mean that it is also widely accepted as a living philosophy nor that it has come to be embodied in public policy Consequently there is a need to precisely examine the problems brought about by the economic mechanisms standing in the way of this goal in particular globalization and to draw up plans to counteract these influences In the meantime sustainability transitions do require a series of system innovations and transitions and it is important to foster robust environmental governance for sustainable development This book aims firstly to examine the implications of the idea of sustainable development for institutional and policy designs Secondly it aims to clarify the political social and economic conditions for successful sustainability transitions by means of the detailed empirical analysis of a host of challenging social experiments for sustainable development Finally it searches for and formulates a viable theory of transition management for sustainable development Publisher description *Comparative Perspectives on E-Government* Peter Hernon,Rowena Cullen,Harold C. Organisation for Economic Co-operation and Development,2000 OECD s 2000 review of regulatory reform in Hungary It finds that after ten years of determined reform Hungary has constructed the legal and policy frameworks consistent with market democracy and is nearing completion of an historic economic transition This challenging process required extensive regulation and institution building as well as massive deregulation and has generated significant economic benefits Today convergence with the EU and achievement of OECD best practices still represent daunting tasks But in most areas Hungary faces challenges much like those of other OECD countries in establishing the quality regulatory regimes needed to support good government and sustainable economic growth Hungary s main objectives now are to bring market performance into line with its peers through strengthening competition and improving regulatory governance and social protections Further reforms will bring important gains in creating jobs improving sectoral and regional performance and reducing the costs of public policies **Asian Review of Public Administration** ,2005 *Public Administration Review* Leonard Dupee
