### **Entrepreneurship for Rural Start-ups** Gloria Jiménez-Marín,Alejandro

López Rodríguez,Miguel Torres García,José Guadix Martín,2021-03-09 Entrepreneurs who start out with no network no money no market and scarce resources find a big contrast between what they read in books and the success stories from the Valley and their reality specially first timers. Most entrepreneurial books focus on the Business Canvas Model simplifying the process of building a start up. Many entrepreneurs who have no previous business experience embrace quick and lean methods without the foundations needed to build solid value proposals. This book stands out because it deals with entrepreneurship in environments far removed from large cities with fewer infrastructures connections and resources but

which also need companies that provide services to citizens and society This book focuses on the basics treating each part of the business canvas as a discipline itself that must be mastered The book illustrates key lessons learned and offers guidance on essential topics for new venture success in mainstream markets It expands critical lessons learned and points of guidance across several key topics for new venture creation Noteworthy is the role of context financial understanding building business development skills and start up communications Entrepreneurship for Rural Start ups will be of interest to students academics and researchers in the field of entrepreneurship and will be of use to individuals looking to start a local business to take advantage of the rural environment and the possibilities it offers *Entrepreneurship and New Value Creation* Alain Fayolle,2007 Why do some individuals decide they want to create businesses and then actually do so Why do others decide against this course of action even though they appear to have what it takes to succeed These two questions were among the first that researchers in the field of entrepreneurship tried to answer Today it seems that the problem is much more difficult to solve than it first appeared thirty years ago The venture creation phenomenon is a complex one covering a wide variety of situations The purpose of this book is to improve our understanding of this complexity by offering both a theory of the entrepreneurial process and practical advice on how to start a new business and manage it effectively Entrepreneurship and New Value Creation is a highly original research driven book that will appeal to graduate students researchers and reflective practitioners concerned with the dynamics of the entrepreneurial process
