Multicultural Personality Assessment* Richard H. Dana, 2000-02 Throughout the world as in the United States psychologists  
are increasingly being called upon to evaluate clients whose backgrounds differ from their own It has long been recognized  
that standard personality and psychopathology assessment instruments carry cultural biases and in recent years efforts to  
correct these biases have accelerated The Handbook of Cross Cultural and Multicultural Personality Assessment brings  
together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present  
state of the art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology  
They consider research methodology the design and construction of standard objective and projective tests the use of  
measures of acculturation racial identity and culture specific tests the social etiquette of service delivery and the  
interpretation of test data for clinical diagnosis Ranging widely through all the relevant issues they share a common  
collective vision of how culturally competent services should be delivered to clients The Handbook offers the first  
comprehensive view of a consistent approach to cultural competence in assessment a necessary precursor of effective  
intervention It will become an indispensable reference for all those whose practice or research involves individuals with
