Nice Routledge Handbook Identity Environment Classical:

The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds Rebecca Futo Kennedy, Molly Jones-Lewis, 2016-01-08 The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds explores how environment was thought to shape ethnicity and identity discussing developments in early natural philosophy and historical ethnographies Defining environment broadly to include not only physical but also cultural environments natural and constructed the volume considers the multifarious ways in which environment was understood to shape the culture and physical characteristics of peoples as well as how the ancients manipulated their environments to achieve a desired identity This diverse collection includes studies not only of the Greco Roman world but also ancient China and the European Jewish and Arab inheritors and transmitters of classical thought In recent years work in this subject has been confined mostly to the discussion of texts that reflect an approach to the barbarian as other The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds takes the discussion of ethnicity on a fresh course contextualising the concept of the barbarian within rational discourses such as cartography medicine and mathematical sciences an approach that allows us to more clearly discern the varied and nuanced approaches to ethnic identity which abounded in antiquity The innovative and thought provoking material in this volume realises new directions in the study of identity in the Classical and Medieval worlds

Identities in Antiquity Joseph Skinner, Vicky Manolopoulou, Christina Tsouparopoulou, 2025-06-30 *Identities in Antiquity* is a multi disciplinary platform for the synthetic study of ancient identities set in a more rounded and inclusive notion of antiquity The volume showcases methodological and theoretical approaches to the study of ancient identities by scholars from different disciplinary backgrounds and career stages In doing so it promotes a more holistic approach to the study of ancient identities facilitating comparisons between different periods and disciplines and generating new knowledge in the process Chapters illustrating the intersecting multifaceted and mutable or else highly immutable nature of ancient identities address themes such as ethnicity race gender mobility religion and elite and sub elite identities most notably that of the enslaved in case studies spanning the ancient Mediterranean world and beyond from the third millennium BCE until the early Middle Ages The volume is suitable for students and scholars working on the Ancient Near East the Graeco Roman Worlds Late Antiquity and Byzantium offering a valuable contribution to the study of past identities and the internal workings of ancient societies

New Directions in the Study of Ancient Geography Duane W. Roller, 2020-07-28 This volume brings together five essays that represent the latest directions in the study of geography in classical antiquity Arranged chronologically these contributions cover several centuries and cultures ranging from ancient Mesopotamia to the Roman Empire and deal with topics such as ancient cosmology literary interpretations of geography ancient navigation and geography in the Roman Imperial world Beginning in the ancient Near East Paul T Keyser s essay considers how Greek scholars whose views on the cosmos are still relevant today were influenced by early Near Eastern

beliefs about the universe Moving to the Hellenistic period Duane W Roller presents and provides commentary on a navigational guide for Ptolemaic seamen written by Ptolemy II s chief of naval staff Timosthenes of Rhodes Georgia L Irby provides an analysis of a literary map the Shield of Aeneas from Vergil s Aeneid as well as a detailed study of Pomponius Mela and his Chorographia the earliest surviving Greco Roman geographical treatise and the only extant independent geographical work in Latin An essay by Molly Ayn Jones Lewis completes the volume by describing how Tacitus s Germania of the early second century AD is a work heavily reliant on environmental determinism an issue that is still relevant today Together these essays demonstrate the great diversity of both ancient geographical writing and modern scholarship on ancient geography This volume will be greeted with enthusiasm by ancient historians and classical studies scholars particularly those interested in the cultural and political facets of geography

Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene Christopher Schliephake, Evi Zemanek, 2023-02-06 Anticipatory Environmental Hi Stories from Antiquity to the Anthropocene studies the interplay of environmental perception and the way societies throughout history have imagined the future state of nature and the environments in which coming generations would live What sorts of knowledge were and are involved in outlining future environments What kinds of texts and narrative strategies were and are developed and modified over time How did and do scenarios and narratives of the past shape hi stories of the future This book answers these questions from a diachronic as well as a cross cultural perspective By looking at a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives the contributors illustrate the multifaceted character of environmental anticipation across the ages
