*History of Western Civilization II* Pauline Relyea Anderson, Eugene Newton Anderson, 1957      **Study Guide** James Schmiechen, 2004      *Imperialism and the development myth* Sam King, 2021-09-07 China and other Third World societies cannot catch up with the rich countries The contemporary world system is permanently dominated by a small group of rich countries who maintain a vice like grip over the key parts of the labour process over the most technologically sophisticated and complex labour Globalisation of production since the 1980s means much more of the world's work is now carried out in the poor countries yet it is the rich imperialist countries through their domination of the labour process that monopolise most of the benefits Income levels in the First World remain five and ten times higher than Third World countries The huge gulf between rich and poor worlds is getting bigger not smaller Under capitalist imperialism it is permanent China has moved from being one of the poorest societies to a level now similar with other relatively developed Third World societies like Mexico and Brazil The dominant idea that it somehow threatens to catch up economically or overtake the rich countries paves the way for imperialist military and economic aggression against China King's meticulous study punctures the rising China myth His empirical and theoretical analysis shows that as long as the world economy continues to be run for private profit it can no longer produce new imperialist powers Rather it will continue to reproduce the monopoly of the same rich countries generation after generation The giant social divide between rich and poor countries cannot be overcome
