GENERAL MODEL OF PERCEPTION. THE KOKHAN'S MATHEMATICS Кохан Анатолий Аркадьевич,2025-02-26 I

am interested in how the physics of social relations works how technologies function what truly constitutes our experience and what is merely a hypothesis I understand that in this world nothing exists contrary to the laws of physics whether in our physiology in technology or in social relations Ultimately everything boiled down to formalization the only formal science mathematics I searched for answers in textbooks but I found them in reality or rather in the formalization of subjective reality in what we are accustomed to calling mathematics However the answers only aligned when explicit cognitive biases were eliminated from mathematics revealing the picture that each of us inherently sees until naivety and trust lead us to believe in someone's deliberate or accidental lies Other people not only create what you use in life they are the source of your perception and will remain so They are the most valuable thing you have just as you are unique and invaluable to others until lies rob you of reason Not utilizing the cognitive potential of everyone is an unforgivable waste The world is beautiful but it is predictable only to the extent that your knowledge allows The world may seem bleak if you have not yet learned to use it in a way that yields expected results rather than failures We must learn to use without errors what is physiologically a necessary part of our lives communication To my surprise eliminating cognitive errors from mathematics not only changes perception but also solves a vast number of modern technological problems and harmonizes our coexistence with technology

Neural Networks In Pattern Recognition And Their Applications Chi Hau Chen, 1991-12-27 The revitalization of neural network research in the past few years has already had a great impact on research and development in pattern recognition and artificial intelligence Although neural network functions are not limited to pattern recognition there is no doubt that a renewed progress in pattern recognition and its applications now critically depends on neural networks This volume specially brings together outstanding original research papers in the area and aims to help the continued progress in pattern recognition and its applications
