Only then will sustainable management succeed. DayWater, an Adaptive Decision Support System for Urban Stormwater Management, advances this cause of sustainable urban management through Urban stormwater management and makes it achievable by means of risk and vulnerability tools which are included in the goal of integrated urban water management (IUWM).

Complex Systems, Smart Territories and Mobility Patricia Sajous, Cyrille Bertelle, 2021-01-27. This book reflects the outcome of contribution by the plural community and of the interactions between disciplines. With the mass of data available through Information and Communication Technologies (ICT) in an unprecedented quantity since the Human History, it is now possible to access dimensions of knowledge that though not hidden could not be grasped in the same way in the past. The question of how this information can be used for the benefit of institutional and economic actors to foster the development of a territory. Tackling the issue from a resolutely interdisciplinary perspective, the authors explore the theories and methods of complex systems in order to discuss how they can contribute in these new circumstances to territorial intelligence and to the development practices in which it is embodied. This book illustrates how today's research explores the multiple facets of territorial systems in order to reproduce their richness. It invites readers to learn about the challenges, ideas, results, and advances present in this domain.
