BABY CARE GUIDE

Newborn Care Guide

Yi-Tong Ma

Newborn Care Guide:

Maternal and Newborn Care Joanita De Kock, Christa Van der Walt, 2004 The midwife's role is examined in the community and family health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers. The skills, competencies and knowledge required to make informed decisions about neo and postnatal care are covered, including anatomy and the physiology of reproduction, high risk pregnancies and labor and birth. Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies, with attention to the unique challenges of midwifery in developing nations. Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health service delivery.

Pregnancy, Childbirth, Postpartum, and Newborn Care, 2003 This guide provides a full range of updated evidence based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post-abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life, or later for routine and emergency care. This guide is a guide for clinical decision making. It facilitates the collection, analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.

parents have. Whether their little one is eating the right amount Every baby is unique but there are some basic guidelines to keep in mind when it's time for a feeding. How Much Do Babies Eat Newborn to 2 months During their first month babies need to eat 8-12 times each day. That's about once every 2-3 hours. Some who are breastfeeding though can eat every 1-5 hours and up to 15 times a day. If your baby isn't waking up on his own for feeding during the first few weeks you should get him up to eat on schedule. If you're breastfeeding your little one will spend about 10 to 20 minutes on your breast. Some may nurse for longer but make sure he's sucking and swallowing the whole time. Giving formula Plan on your baby drinking 1-5 to 3 ounces at each feeding. After about a month he'll start eating at least 4 ounces at each feeding. As breastfed babies get the hang of nursing they'll get more milk from you too. You may not notice though since they'll do it in less time. Whether you're nursing or bottle feeding as your baby keeps growing so will his appetite. BUY NOW to access all the newborn care guidelines.

Baby and Me Deborah D. Stewart, Jenny B. Harvey, 2015 Completely revised and updated. Cover [Basic Maternal and Newborn Care](#) Barbara Kinzie, Patricia Gomez, Rebecca Chase, 2004-01 This reference manual is intended for use by skilled providers including midwives, doctors, and nurses who care for women experiencing normal pregnancies, births, and postpartum periods as well as their normal newborns in low resource settings. [Early Essential Newborn Care](#) WHO Regional Office for the Western Pacific, 2015-04-20 Approximately every two minutes a baby dies in the WHO Western Pacific Region. The majority of newborn deaths occur within the first few days mostly from preventable causes. The high mortality and morbidity rates among newborns are related to inappropriate hospital and community practices that currently occur throughout the Region. Furthermore, newborn care has fallen into a gap between maternal care and child care. This Guide provides health professionals with a user friendly evidence based protocol to essential newborn care focusing on the first hours and days of life. The target users are skilled birth attendants including midwives, nurses, and doctors as well as others involved in caring for newborns. This pocket book provides a step by step guide to a core package of essential newborn care interventions that can be administered in all health care settings. It also includes stabilization and referral of sick and preterm newborn infants. Intensive care of newborns is outside the scope of this pocket guide. This clinical practice guide is organized chronologically. It guides health workers through the standard precautions for essential newborn care practices beginning at the intrapartum period with the process of preparing the delivery area and emphasizing care practices in the first hours and days of a newborn's life. Each section has a color tab for easy reference. [**The Ultimate Guide to**](#)
