the core midsection and other muscles that often get neglected by other activities My introduction to Pilates happened at an early age For most of my life I was considered tall for my age with long legs and big feet My parents thought it would be a good idea to enroll their lanky toddler in ballet classes I continued those classes and other dance classes for over 14 years In high school I was a lean 5'8" ballet dancer and basketball player I still had big feet but they were complemented by long legs long arms and a long neck What did I have to complain about My midsection I was relatively slim but I had a pudgy middle In high school where appearances are everything I wanted to do something about it Fortunately around this time my dance instructor introduced the class to the Pilates method She said that Pilates is based off of the ballet moves many of us had been doing for most of our lives She promised that the method would flatten our midsections and make us feel taller My dance instructor made good on her promise After just 15-20 minutes of Pilates before we started dancing I felt taller Over time I felt slimmer I was hooked I've been doing Pilates ever since and I love it I've taken classes and I've done several Pilates DVDs Of all the activities I participate in everything from running to basketball to kickboxing to Zumba Pilates is one that I always come back to because it is really so effective and important

Advanced Pilates Exercises

The Crab The Crab requires complete control from your core so it will give you a great ab workout It builds on exercises like the Roll Up but is slightly more advanced Start by sitting up straight Bend your knees almost Indian style and cross your feet at the ankles Bring your knees up to your shoulders and grab your feet with your hands Drop your head and allow your spine to curve as you prepare to roll Breathe in and roll back Control the movement Try not to let your limbs flail around Once you roll to your shoulders let go of your feet and switch your feet around Grab your feet again as you prepare to roll up Breathe out and roll forward Inhale as your head touches the mat Roll back to repeat the move

Double Leg Kick This move works the back extensors and the hamstrings primarily but it can be a total body exercise as well Start by lying face down with your head turned to one side and your feet together
