*The Handbook of Fashion Law*, 2025-02-12 Over the past few years fashion law has emerged as a vibrant field of inquiry. The legal and policy issues affecting the fashion sector have been investigated with increasing intensity while a growing number of private practice lawyers and in house counsel regard themselves as practising fashion law. But what is fashion law? And what are the specific legal challenges facing the fashion sector as well as related solutions? *The Handbook of Fashion Law* seeks to answer these questions by bringing together multiple voices, approaches and jurisdictions. Its contributions are organized into four thematic areas. Part I considers the legal infrastructure of the fashion and luxury industries addressing issues related to intellectual property, IP, as well as the demands of the circular economy, protection of cultural heritage and freedom of expression and information. Part II maps the IP dimensions of fashion by reviewing the application of design rights, copyright, trade marks, geographical indications, plant variety rights and trade secrets. Part III analyses specific contractual issues arising in the fashion sector. It examines the application of principles and rules found in regulatory frameworks including those governing advertising, competition, consumer and tax laws. Finally, Part IV dissects and evaluates the role of new and emerging technologies in the fashion sector from a legal perspective. It considers concepts such as e-commerce, 3D printing, counterfeiting, artificial intelligence, non-fungible tokens, NFTs, the metaverse, gaming and wearable technology. *The Handbook of Fashion Law* offers readers a multidisciplinary and multijurisdictional understanding of legal challenges facing the fashion sector. Bringing together a diverse range of experts, its contributions offer readers an in-depth critical and strategic understanding of the fashion industry's legal intricacies.

*Sustainable Sportswear and Activewear* Rajkishore Nayak, 2025-05-01 Sustainable Design of Sportswear and Activewear addresses all aspects of the production and manufacture of sportswear and activewear that impact on the environment from across the supply chain. The demand for sportswear and activewear is increasing rapidly with many brands focusing on sustainable manufacturing, distribution, usage and disposal. This book covers all processes from the selection of sustainable raw materials till the end of life. Particular attention is paid to various sustainable design methods that have been used in industry, methods for circular economy and specialized methods for life cycle assessment as well. Describes assessments for the sustainability of traditional and synthetic materials used in activewear. Provides data and standards for assessing the specific properties required for these garments. Includes case studies from a range of clothing manufacturers.
