Western business leaders make two key assumptions about China that China is always copying the West and that the West is the seat of innovation. The truth is surprising. China is both copying and innovating and while Western businesses are busy looking for the next new thing China is rapidly iterating on what's already been done and pushing ahead. While businesses in the West are getting disrupted and left behind the savvy leaders among them can learn, innovate and excel by copying China's playbook. Chinafy distils the key lessons from China to unlock business potential anywhere in the world. These lessons serve as catalysts for how to Chinafy innovation for growth. Taking a deep dive into the workings of China's most successful brands from Haier to ByteDance author Joanna Hutchins reveals what it takes to get ahead in the world of business and innovation.

Charifzadeh, 2023-11-29. In today's business landscape companies compete more and more as integrated supply chains rather than as individual firms. The success of the entire supply chain determines the economic well being of each company involved. With management attention shifting to supply chains the role of management accounting naturally must extend to the cross company layer as well. This book demonstrates how management accounting can make a significant contribution to supply chain success. It targets students who are already familiar with the fundamentals of accounting and want to extend their expertise in the field of cross company or network management accounting. Practitioners will draw valuable insights from the text as well. This second edition includes a new Chapter on Digitalization and Supply Chain Accounting as well as new opener cases to each chapter that provide real world examples.
