*Managing IBM DB2 10 for z/OS Using the IBM DB2 Administration Tool for z/OS Version 10* Paolo Bruni, Tom Crocker, Elaine Morelli, Richard Schaufuss, Jane Yang, IBM Redbooks, 2011-04-22 Today's business environment has increased in the complexity and rate of change that a database administrator must control. The ability to respond quickly to a changing environment is constantly challenged by the explosion of data growth combined with a decline in an experienced work staff. The IBM DB2 Administration Tool for z/OS Version 10 helps you become productive from Day 1 with DB2 10 for z/OS by using performance savings right away, lowering the CPU costs while reducing the batch window. Users experience higher data availability by easily managing online schema changes including additional columns to indexes to use index only access. Customers are able to experience higher data availability through simplified recovery operations. Access new functionality in DB2 10 for z/OS to lower costs and improve efficiency both before, during, and after the DB2 migration process. Maximize the performance of your key DB2 business applications to speed their deployment in DB2 10 for z/OS. Improve the productivity and efficiency of your staff when DB2 10 for z/OS is running. This IBM Redbooks publication highlights the data administration enhancements introduced by DB2 Administration Tool for z/OS Version 10 by providing scenarios of their use with the new functions provided by DB2 10 for z/OS.

High Performance Computing: Technology, Methods and Applications J.J. Dongarra, L. Grandinetti, J. Kowalik, G.R. Joubert, 1995-09-13 High Performance Computing is an integrated computing environment for solving large scale computational demanding problems in science, engineering, and business. Newly emerging areas of HPC applications include medical sciences, transportation, financial operations, and advanced human computer interface such as virtual reality. High performance computing includes computer hardware, software, algorithms, programming tools, and environments plus visualization. The book addresses several of these key components of high performance technology and contains descriptions of the state of the art computer architectures, programming, and software tools and innovative applications of parallel computers. In addition, the book includes papers on heterogeneous network based computing systems and scalability of parallel systems. The reader will find information and data relative to the two main thrusts of high performance computing: the absolute computational performance and that of providing the most cost effective and affordable computing for science, industry, and business. The book is recommended for technical as well as management oriented individuals.

**C++ Standard Library Quick Reference** Peter Van Weert, Marc Gregoire, 2016-06-13 This quick reference is a condensed guide to the essential data structures, algorithms, and functions provided by the C Standard Library. Used by millions of C programmers on a daily basis, the C Standard Library features core classes for strings, I/O streams, and various generic containers, as well as a comprehensive set of algorithms to manipulate them. In recent years, the C11 and C14 standards have added even more efficient container classes, a new powerful regular expression library, and a portable multithreading library featuring threads, mutexes, condition variables, and atomic variables. Needless to say, it is hard to know
