Release Notes

Release 10.1.3.5.0

CSREL

July 2009

---

These release notes outline new and enhanced features in this release of Content Server. In addition, they address a number of specific installation issues as well as special considerations that should be taken into account for this version of Content Server.

## 1 Updates Since Initial Content Server 10g Release 3 (10.1.3.3.0)

This section describes updates to software and documentation since the original publication of these release notes.

### 1.1 Running Services as a Specific User

During Content Server 10gR3 installation, the option to run the Admin Server and Content Server services as a specific user is offered. The correct syntax for defining a specific user takes the following form:

- Local user syntax is: `username=.\[username]`
- Domain user syntax is: `username= [domain]\[username]`

### 1.2 JDBC Driver Update Required

If you are updating from either Content Server version 7.5.2 or previous version, you need to acquire a new JDBC driver when installing this version of Content Server with Microsoft SQL Server. This is discussed in the Content Server Installation Guide.

If you are already using the new JTds driver, or if you use the Microsoft SQL Server 2005 driver, then you won't need a new jdbc driver.

### 1.3 New Virtual Content Repository Component

A new component used to support WebLogic Portal integration is added to Content Server called Virtual Content Repository, abbreviated as VCR. It can be uninstalled or disabled if you are not using WebLogic Portal integration.

### 1.4 Language Configurations

An MS Windows system that is running either an admin applet, or the server desktop running a standalone admin application, needs to have the desired language selected as the language of the desktop being used. On Windows XP
