come the authors argue for the Korean government to stop managing the economy's structural development and to redefine the responsibilities of business and government. Under this proposed compact the allocation of resources would shift from the government to the private industrial and financial sectors. The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking. These new directions would present the government with enormous challenges. Greater competitive discipline and regulatory oversight would be required. While dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the momentum of savings and investment. For comparison the study examines the industrial economies of France, Germany, Japan and the United States which underwent similar shifts. *Government Reports Announcements & Index*, 1995
