National Traffic Incident Management Responder Training Program, 2015 Plug In Electric Vehicles in Smart Grids Sumedha

Rajakaruna, Farhad Shahnian, Arindam Ghosh, 2014-11-29. This book covers the recent research advancements in the area of charging strategies that can be employed to accommodate the anticipated high deployment of Plug in Electric Vehicles (PEVs) in smart grids. Recent literature has focused on various potential issues of uncoordinated charging of PEVs and methods of overcoming such challenges. After an introduction to charging coordination paradigms of PEVs, this book will present various ways the coordinated control can be accomplished. These innovative approaches include hierarchical coordinated control, model predictive control, optimal control strategies to minimize load variance, smart PEV load management based on load forecasting, integrating renewable energy sources such as photovoltaic arrays to supplement grid power using wireless communication networks to coordinate the charging load of a smart grid and using market price of electricity and customers' payment to coordinate the charging load. Hence, this book proposes many new strategies proposed recently by the researchers around the world to address the issues related to coordination of charging load of PEVs in a future smart grid.

PV Charging and Storage for Electric Vehicles Pavol Bauer, Gautham Ram Chandra Mouli, 2021-09-02. Electric vehicles are only green as long as the source of electricity is green as well. At the same time, renewable power production suffers from diurnal and seasonal variations, creating the need for energy storage technology. Moreover, overloading and voltage problems are expected in the distributed network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles. The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy. This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles.
