Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien,2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However on the other hand it pointed out Germany s weaknesses in digital infrastructures and cybersecurity Additionally many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic However there aren t any specific regulations regarding remote work in Germany yet In general remote work provides workers e g more freedom and a better work life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co workers less productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything s going remotely companies have become an easier target of cyber attacks **Mobile services in retail and their influence on customer satisfaction** Joern Toellner,2014-03-31 Master s Thesis from the year 2014 in the subject Business economics Offline Marketing and Online Marketing grade 2 3 University of Applied Sciences Essen course Master

Rankin, 1991 Reexamination of the role of the West in U.S. history and of the field of western history itself told by ten historians Mastering Megatrends Doris Naisbitt, John Naisbitt, 2017-12-28 From the author of the New York Times bestseller Megatrends Ten New Directions Transforming Our Lives comes the new title on dealing with the complexity of change It is one thing to spot the real trends from the fads but it is another whole new ball game to deal with the incoming trend This is the centrepiece of Mastering Megatrends Cross-Cultural Considerations in Change Management. Exploring the Impact of Culture on Communication and Participation in Emerging Markets China and India Valentina Weiß, 2023-03-21 Master's Thesis from the year 2022 in the subject Business economics Business Management Corporate Governance grade 1.3 University of Applied Sciences Aschaffenburg language English abstract Do cultural differences affect crucial success factors for change management processes in the cross cultural work environment and if so in which way This thesis provides

an insight into the scope of cultural influences on the immediate success or failure of change processes. More precisely it discusses the cultural influences of China and India on change management processes using the two success factors communication and participation as examples. This way awareness is created for cultural differences and impressions of conflicts along the change process due to cultural differences are provided. Already described approximately 2 500 years ago by the Greek philosopher Heraclitus is the constant change of society. Change is not a part of life rather life consists of constant change he claimed. His statement is still valid today. Global megatrends influence each individual the society as such and of course also all kinds of corporations institutions and organizations acting within the society. The influence of global megatrends leads to a shift in economic systems and forces companies to rethink. Adaptability to the ever changing environment is the key factor for success for enterprises and will become more and more important over the next five to ten years. Megatrends like the digitization and globalization enable or even require oversea business relationships cooperation with and expansion to different continents. Cross cultural teams are more common than ever. Various employee's expectations needs and ways of working collide in an increasingly dynamic and complex work environment. Companies with worldwide operations undergo global change processes not only local ones. Emerging markets are of particular interest as the global economy and the availability of skilled labour shifts Eastwards. Additionally a company undergoes several transformative steps which trigger internal change when growing. It can be noted that cross cultural change processes are not a one off occurrence but are increasingly needed in varying degrees of intensity. *Hayseeds, Moralizers, and Methodists* Robert Smith Bader, 1988. The tattered image of modern day Kansas and how it got that way is the subject of this pioneering and wonderfully entertaining book. Robert Smith Bader traces the rise and fall of the state's reputation from the turn of the century when it was a national leader in the two most prominent sociopolitical movements of the era Progressivism and prohibition through the Jazz Age when Kansas came to epitomize strait laced fundamentalist values. H L Mencken proclaimed it the quintessential cow state chock full of hayseeds moralizers and Methodists to today's consensus view of Kansas as drab and boring. The book concludes with a marvelous survey of recent popular culture and with a call for a reexamination of the state's historic strengths.
