Master's Thesis from the year 2009 in the subject Communications Multimedia Internet New Technologies grade B1 University of Glasgow course Media Management language English abstract The music business is one of the few industries

that has trouble growing profits in its transition to digital. Digital media downloads, mobile music streams, music flat rates, peer-to-peer networks, and the rise of freeconomics on the Internet are partly responsible for the reduction in CD sales in recent years. The question that is most important for the industry is how the widespread of freely available content and illegal downloading can be monetized. One approach to model around the main threats to the music industry is the development of online music services. Thus, this study is an attempt to address the issue of what are the opportunities and challenges posed by online music services for the music recording industry. Referring to empirical findings of a consumer survey and expert interviews, both opportunities and challenges can be identified for the music recording industry. The opportunities surrounding the development of these services are encouraging. Deriving from the challenges, the music recording industry must ensure that online music services are a supplement to traditional ways of consumption and do not turn into a replacement of physical music consumption. Concluding, online music services have a small impact on the recording industry. The industry might benefit from closely cooperating with online music services by learning more about consumers' tastes. Nevertheless, the online businesses are struggling to break even, and revenues from streaming will not overcome legal downloads or CD sales as major revenue stream anytime soon.

**Artificial intelligence (AI) for International Politics** Malam Wasai, 2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda, challenging geostrategic relations, serving as a tool for diplomats and negotiators, and creating new opportunities and concerns about protecting human rights. Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis: individual, state, and international. State level analysis examines the foreign policy behavior of states in terms of state characteristics. For example, some scholars say that all democracies behave a certain way; they don't fight with other democracies. Artificial intelligence impacts governance. As AI continues to evolve and permeate various aspects of our lives, its implications for AI and how it impacts businesses. AI, artificial intelligence, refers to machines that can perceive, intelligence, synthesize, and infer information. It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect, improve themselves based on AI. AI is designed to significantly enhance human capabilities and contributions, making it a valuable business asset.
