**Business Models and Strategies for Open Source Projects** Monaco, Francisco José,2023-07-17 Since its emergence in the mid 1980s through the protagonism of free software and open source movements the concept of freely shareable technology has steadily established itself in the following decades to enter the 21st century as a leading industrial paradigm From the original ambit of software technology the principles of collaborative

construction of publicly accessible knowledge grounding the open source paradigm have been extended to embrace any intellectual artifact made available under non exclusive rights of utilization development and distribution It is noteworthy however that whilst on one hand it is not difficult to enumerate advantages of the use of open source products by individuals and organizations whether related to cost reduction socio technological inclusion governance of technology development security and privacy transparency among others on the other hand it is not as immediate to identify their motivation to develop open source technology While there may surely be initiatives driven by either ethical grounds personal avocation or public policies those reasons alone do not explain the lasting success of many large community driven projects nor why large commercial enterprises massively invest in open source development Business Models and Strategies for Open Source Projects investigates the rationales and the strategy underlying companies decisions to produce and release open source products as well as which business models have succeeded Covering topics such as embedded systems open source ecosystems and software companies this premier reference source is a valuable resource for entrepreneurs business leaders and managers students and educators of higher education librarians software developers researchers and academicians

Lim,2000-11-16 In the next millennium it is anticipated that human factors issues will take centre stage in initiatives targeted at enhancing economic competitiveness and productivity This development is already discernible in nascent knowledge and digital based industries and economies which are expected to emerge in force in the near future and continue to dominate thereafter These developments will establish irreversibly the emerging global economy The theme of the APCHI 2000 conference is Towards a seamless integration of collaborative human computer systems to reflect the already discernible shift in focus of human computer interaction HCI whilst the theme of the ASEAN Ergonomics 2000 conference is From user centeredness to people centeredness to reflect the imminent shift in focus that is required of human factors The papers in these proceedings provide a good contrast of human factors contributions to both old and new economies that make up ASEAN and APEC They highlight the diverse roles human factors can play in advancing the quality of life in developed developing and third world nations They also serve as a guide to human factors practitioners in old economies on what to expect as their economies develop

[Managing Program Evaluation: Towards Explicating a Professional Practice](#) Donald W. Compton,Michael L. Baizerman,2009-04-13 This book explores issues in understanding managing evaluation an often invisible process guiding evaluation studies evaluators other workers and evaluation units The chapters define and illustrate through four case studies Central questions in the domain of managing

are Should the evaluation field recognize managing as a core professional expertise Should it promote this by legitimizing preparation of experts and expertise What should curriculum pedagogy and learning sites be The authors suggest beginning foci curricula and pedagogy in managing evaluation and wish to stimulate reflection and conversation within our profession on how to manage evaluation in various contexts and multiple layers Hyper-Exploitation in the Hacker Movement Yilmaz Aliskan,2023-09-05 In this book Yilmaz Aliskan discusses the capitalist exploitation of digital media and examines how free time and creativity can be exploited in open source communities with corporations often benefiting from community generated knowledge Focusing on open source hardware communities in which hackers give up a considerable amount of free time and creativity to create open technology Aliskan investigates how free time becomes a hyper exploited commodity from which capital is increasingly accumulated Whereas paid workers are still often exploited Aliskan posits that open source workers are further hyper exploited by technology companies as they receive no compensation for their labour Ultimately this book reveals how the time and activity of volunteers in open source communities are ripe for capitalist exploitation that blurs the line between leisure and work time often disguised by assertions that such labour is fun or in line with volunteers personal interests or values Scholars of communication digital media sociology and labour studies will find this book of particular interest *Madden & Owen on Products Liability* David G.
