Outer Space And Global Security Outer Space And Global Security:

   Outer Space and Global Security ,2003 This publication contains a number of papers presented at an international conference on the current and future military uses of space held in Geneva in November 2002 as well as the conference report Participants who included governmental and non governmental representatives discussed a wide range of short and long term measures to enhance space security including the possibility of a ban on the deployment of any weapons in space

   Space Technology Export Controls and International Cooperation in Outer Space Michael Mineiro,2011-11-08 Export controls definitively impact international cooperation in outer space Civil and commercial space actors that engage in international endeavors must comply with space technology export controls In the general discourse members of the civil and commercial space community have an understanding of their domestic export control regime However a careful reading of the literature on space technology export controls reveals that certain questions relevant to international engagements have not been identified or answered What is the legal political origin of space technology export controls How do they relate to the current international legal structure What steps can be taken to evolve our current unilateral paradigm of space technology within the context of peaceful exploration and use of outer space In this book these and other relevant questions on space technology export controls are identified and assessed through an insightful case study of the U S commercial communication export control regime The findings of this case study are used in an international legal political analysis of international space law public international law and international cooperation Breaking new ground in international legal theory a self justified security dilemma that is manifest in international law is identified and explained as the origin for the current paradigm of space technology export controls   Geopolitics of Outer Space Ilayda Aydin,2019-07-05 Civilization in the twenty first century is characterized by its technological capacity which is substantially realized through space technologies A desire for increased security and rapid development is driving nation states to engage in an intensifying competition for speed and superiority to better utilize the unique assets of space This competition however is rigorously challenged by the unforgiving physical properties of the space environment such as extreme temperatures and intense fluxes of radiation as well as by an escalation in nuclear proliferation that could end all life known to human existence Despite these challenges humanity is taking eager steps into space and is taking its various geopolitical rivalries and imperatives along Does space development further or undermine global security Can an obsession with security pose an ironically existential threat to humanity in this most fragile yet unforgiving environment it is stepping into This book analyses the Chinese American space discourse from the lenses of international relations theory history and political psychology to explore these questions   *The Oxford Handbook of the International Law of Global Security* Robin Geiß,Nils Melzer,2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century On a global scale the central regulatory tool for such responses is public international law But what is the

state role and relevance of public international law in today s complex and highly dynamic global security environment Which concepts of security are anchored in international law How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area **Meta-Geopolitics of Outer Space** N. Al-Rodhan,2012-05-11 Al Rodhan sheds new light on the debate about the geopolitics of outer space going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework The meta geopolitics framework includes space and expands classical power considerations to cover seven state capacities **International Security Dimensions of Space** Fletcher School of Law and Diplomacy.
