Cultural Genocide: How Radical Capitalism Destroys People's Intellectual Skills Pablo Medina

Aguerrebere, 2024-08-02 Radical capitalists running some companies public organizations and governments resort to aggressive techniques to destroy people's intellectual skills. Some examples of these criminal practices are preventing employees from enrolling in lifelong learning programs forcing students to go to unfunded high schools or allowing universities to become corporations that do not care about knowledge. Citizens need to be aware of these corporate behaviors otherwise radical capitalism will destroy their social consciousness and condemn them to be enslaved people who only work and buy products but do not think and do not understand society. In this book I identify some of these practices and propose ideas to protect people's right to learn. This book consists of five chapters each focusing on different life stages: childhood (0-12 years), adolescence (13-19 years), adulthood (20-39 years), middle age (40-59 years), and old age (60 years and above). Each chapter includes 200 examples from different countries that prove how radical capitalists in some companies, public organizations, and governments try to destroy culture. This cultural genocide affects citizens throughout their lives.

Smart Rivals

Feng Zhu, Bonnie Yining Cao, 2024-08-20 A fresh research-based look at how companies can better compete on their own terms with tech giants from a Harvard Business School professor and a former Bloomberg journalist. Companies are fighting the wrong battle. The consensus has been to learn the best practices from tech giants and then imitate them. But new paths for growth aren't created by imitation; they're forged by radical differentiation. In *Smart Rivals*, Harvard Business School professor Feng Zhu and former Bloomberg journalist Bonnie Yining Cao show business leaders how to create competitive advantages by offering product features and benefits that tech giants and other competitors cannot match in the digital AI age. Taking readers on a global journey, Zhu and Cao showcase a variety of companies including Domino's, Nike, and Sephora, and fascinating case studies such as Belle, the leading women's footwear retailer in China; EbonyLife, Nigeria's top media conglomerate; and Telepass, Italy's popular electronic toll payment service. Through these diverse examples, they illustrate how companies identify their path for growth in the digital age by leveraging their unique capabilities. Drawing on original research and insights gleaned from leaders in a wide range of industries, *Smart Rivals* is a blueprint for uncovering your company's hidden strengths. It will help you spark innovative solutions and capabilities, including new products, services, strategies, and advantages that mere imitation could never provide.
