Global University Rankings and the Politics of Knowledge Michelle Stack, 2021-06-17 For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding. But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university. Drawing on a range of research and inquiry-based methods, *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact. Conceptually unique in its scope, *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems. Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education. Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media-driven rankings. This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics, culture, and the economy to explore how assumptions about gender, social class, sexuality, and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive, environmental, and social injustice.

Violence Prevention and Safety Promotion in Higher Education Settings Badea, Mihaela, Suditu, Mihaela, 2017-08-10 Nonviolent environments are desirable in many areas of life, yet none are as essential as within our educational institutions. Providing a safe space for students has become a critical concern in modern society. *Violence Prevention and Safety Promotion in Higher Education Settings* is a vital resource that examines the current sources of violence within educational systems and offers solutions on how to provide a safer space for both students and educators alike. Highlighting pertinent areas of interest, including technological violence, academic regulations, nonviolent communication, and gender discrimination, this reference publication is ideal for academicians, future educators, students, and researchers interested in recent advancements that aid in providing secure, safe educational environments for everyone.
