expected to arrive in the next two to five years but for now buyers have to make peace with the fact that access to an electric vehicle's low running costs requires a steep initial outlay. Having said that, buying an electric car needn't break the bank if you know where to look. There are several battery-powered cars out there with competitive price tags providing an entirely affordable route into the world of cars. Advertisement To help you on your way, we've put together a list of the top cheap electric cars on sale today. Not all of them will suit your needs; ranges and charge times vary from model to model, but there'll almost certainly be something that ticks all the right boxes. And remember, once you've met the asking price, the total cost of ownership could still be significantly lower than that of a petrol or diesel model, with electricity bills amounting to around three pence per mile on an average household tariff. For those charging overnight when electricity is cheapest, that figure could be even lower. Scroll down to read our list of the cheapest electric cars, starting with Vauxhall Corsa-e 26,490. The Vauxhall Corsa-e is the British brand's first electric car, and it offers 205 miles of range from a 50kWh battery. That's a reasonable return on paper, and 0-31mph in 3.1 seconds should mean it's a pretty nippy runabout, ideal for those who do most of their driving around town. The maximum charging speed is 100kW, which means a 0-80% charge should take around half an hour. So if you do need to go further afield occasionally, and your route has a charging station along the way, then this is feasible too. Read more about the Vauxhall Corsa-e.
