**GENERAL**  
The MP 5 submachine gun (Fig. 1) is a compact, light and reliable weapon designed to harmonize with the most advanced manufacturing methods. It provides either single shots or bursts to be fired from all positions.

The submachine gun is compact, reliable, with maximum barrel and receiver tube bullet base speed.

Its high accuracy is the result of the fact that the receiver is positively locked in the closed bolt position, in conjunction with the most advanced design of bullet base speed.

The closed bolt system holds constant and correct the weapon to be held more firmly when firing bursts.

The safety switch eliminates safety because it has four fire control positions.

The gun receiver is fed from a 15- or 30-round magazine.
