Towards Bayesian Model-Based Demography Jakub Bijak, 2021-12-09 This open access book presents a ground breaking approach to developing micro foundations for demography and migration studies. It offers a unique and novel methodology for creating empirically grounded agent based models of international migration, one of the most uncertain population processes and a top priority policy area. The book discusses in detail the process of building a simulation model of migration based on a population of intelligent cognitive agents, their networks and institutions all interacting with one another. The proposed model based approach integrates behavioural and social theory with formal modelling by embedding the interdisciplinary modelling process within a wider inductive framework based on the Bayesian statistical reasoning. Principles of uncertainty quantification are used to devise innovative computer based simulations and to learn about modelling the simulated individuals and the way they make decisions. The identified knowledge gaps are subsequently filled with information from dedicated laboratory experiments on cognitive aspects of human decision making under uncertainty. In this way the models are built iteratively from the bottom up filling an important epistemological gap in migration studies and social sciences more broadly.

Israeli F-15 Eagle Units in Combat Shlomo Aloni, 2013-01-20 Post Yom Kippur War Israel purchased the F 15 Eagle, the then world's best air to air fighter in an effort to prevent another surprise attack from the air. For the first time in its history the IDF AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first kill F 15 Baz Buzzard arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981 with 33 victories following during the June 1982 Lebanon War. Despite substantial combat no Israeli F 15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF AF with the F 15I Ra'am Thunder to fulfill the long range surface to surface missile mission post Desert Storm. From A to I the extremely capable and combat tested Israeli F 15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.
